

CURRENT SITUATION OF THE OIL SPILL IN THE PASTAZA RIVER CONTROLLED BY PETROPERÚ

Lima, Peru, October 16, 2024 – Petróleos del Peru S.A. "Petroperú" or "the Company" (OTC:PETRPE) announced today that, the oil spill that occurred on October 03, 2024 at Km 11-12 of the North Branch Pipeline at the crossing of the Pastaza River, Andoas district, Datem del Marañón province, Loreto region, was controlled. This action is the result of the implementation of the first response works that consists of the closure of mechanical valves and the confinement of the hydrocarbon with the placement of containment barriers (**see images in next page**), which has made it possible to control the oil spill and prevent its expansion in the impacted area, together with specialized companies. Spill control was certified by OEFA (<https://www.gob.pe/institucion/oefa/noticias/1035044-derrame-de-petroleo-en-rio-pastaza-esta-controlado-y-el-oefa-mantiene-supervision-en-la-zona>).

These actions are part of Petroperú's Contingency Plan approved by the respective entities, which is activated immediately and has contemplated the movement of specialized teams by air and river. The work will continue with the cleaning of the area. Currently, there are no evidence of hydrocarbons at the place of the incident, which confirms that the situation is under control.

In parallel to these operational actions, the social team of Petroperú began coordination with the communal authorities of the area to make known the tasks deployed by Petroperú and the work can be carried out without inconveniences. It is also coordinating with the communal companies in the area to hire local labor in the initial cleaning tasks.

Petroperú will continue to report in a timely manner on the progress of the work and reiterates its commitment to act immediately in the face of these events, in close coordination with neighboring communities.

About Petroperú

Established in 1981 as a Public Limited Company pursuant with Legislative Decree No 43 (founded in 1969), Petroperú is one of the largest hydrocarbon corporate entity in Peru in terms of total sales and the largest enterprise of the Peruvian sovereign (100% owned by Peru). Likewise, it is also the Peru's largest refiner in terms of refining volume capacity and form a critical part of the country's energy infrastructure and economy. Also, it has the largest distribution network for crude oil and refined products in the country, and it is the sole provider of refined products to certain areas of Peru. It is also the concessionaire and operator of Peru's main oil pipeline, the "Norperuano Oil Pipeline", which links the crude oil production fields in the northern rainforest of Peru with our facilities in the Port Bayovar near our Talara Refinery. Its business is comprised primarily of midstream and downstream but also upstream petroleum activities, including: the refining and blending of crude and intermediate hydrocarbon products, the distribution and sale of refined products through our wholesale distributors and associated retail service stations and direct sales, the transportation of crude through the Norperuano Oil Pipeline, the concession of Blocks I, VI, Z-69, 64 and 192, and the leasing of certain of its facilities to third parties.
