Likewise, it is also the Peru's largest refiner in terms of refining volume capacity and form a critical part of the country's energy infrastructure and economy. Also, it has the largest distribution network for crude oil and refined products in the country, and it is the sole provider of refined products to certain areas of Peru. Its business is comprised primarily of midstream and downstream but also upstream petroleum activities, including: the refining and blending of crude and intermediate hydrocarbon products, the distribution and sale of refined products through our wholesale distributors and associated retail service stations and direct sales, the transportation of crude through the Norperuano Oil Pipeline, the concession of Blocks I, 64 and 192, and the leasing of certain of its facilities to third parties.*
