

PETROPERÚ REPORTS INCIDENT AT INACTIVE WELL IN BLOCK VI AND IMMEDIATE REMEDIATION ACTIONS

Lima, Peru, July 09, 2025 – Petróleos del Peru S.A. "Petroperú" or "the Company" (OTC:PETRPE) announced today that upon the immediate detection of production fluids (water, crude oil, and sludge) in the area surrounding Well 383 – Lobitos (inactive), located in Block VI in the Lobitos District, Province of Talara, the Company promptly activated the contingency plan established in its emergency response protocols.

Regrettably, initial access by our specialized response teams was delayed due to resistance from local residents, which hindered timely attention to the incident and increased the potential environmental risk.

The National Police of Peru (PNP) has been notified and is investigating to determine the root cause of the incident. Preliminary observations indicate evidence of unauthorized manipulation of the well valve and a breach of the perimeter fence. The PNP has also been requested to maintain order and facilitate ongoing clean-up efforts.

As of today, Wednesday, July 09, the affected area has been fully cleaned and restored, following remediation efforts carried out by the company's specialized personnel in coordination with the relevant sectoral authorities.

The Company has coordinated and communicated the incident and subsequent actions with both national and regional authorities, including the Ministry of Energy and Mines, the Ministry of the Environment, the Ministry of Health, the PNP, the Regional Government of Piura, the Provincial Municipality of Talara, the Municipality of Lobitos, OEFA, OSINERGMIN, and FEMA Sullana. All parties have been granted full access for oversight and information verification purposes.

Petroperú reaffirms its unwavering commitment to environmental stewardship and to maintaining strong, transparent relationships with the communities surrounding its operations.

About Petroperú

Established in 1981 as a Public Limited Company pursuant with Legislative Decree No 43 (founded in 1969), Petroperú is one of the largest hydrocarbon corporate entity in Peru in terms of total sales and the largest enterprise of the Peruvian sovereign (100% owned by Peru). Likewise, it is also the Peru's largest refiner in terms of refining volume capacity and form a critical part of the country's energy infrastructure and economy. Also, it has the largest distribution network for crude oil and refined products in the country, and it is the sole provider of refined products to certain areas of Peru. It is also the concessionaire and operator of Peru's main oil pipeline, the "Norperuano Oil Pipeline", which links the crude oil production fields in the northern rainforest of Peru with our facilities in the Port Bayovar near our Talara Refinery. Its business is comprised primarily of midstream and downstream but also upstream petroleum activities, including: the refining and blending of crude and intermediate hydrocarbon products, the distribution and sale of refined products through our wholesale distributors and associated retail service stations and direct sales, the transportation of crude through the Norperuano Oil Pipeline, the concession of Blocks I, VI, Z-69, X, 64 and 192, and the leasing of certain of its facilities to third parties.
