PETRÓLEOS DEL PERÚ - PETROPERÚ S.A.

NOTES TO THE INTERIM FINANCIAL STATEMENTS
AS OF SEPTEMBER 30, 2025, DECEMBER 31, 2024, AND SEPTEMBER 30, 2024

1 BACKGROUND AND ECONOMIC ACTIVITY

a) Background -

Petróleos del Perú - PETROPERÚ S.A. (hereinafter, the Company or PETEOPERÚ) was incorporated on July 24, 1969, under Decree Law No. 17753.

The Company is a government-owned company under private law operating in the hydrocarbons subsector within the Energy and Mining Industry. The Company was organized and incorporated as a stock company, under the provisions of Legislative Decree No. 043, Ley de la Empresa Petróleos del Perú - PETROPERÚ S.A., published on March 5, 1981, as amended, by which the Peruvian Government holds the Company's total share capital and the provisions of article 12 of the rules for application of Law No.28840, Ley de Fortalecimiento y Modernización de la Empresa de Petróleos del Perú - PETROPERÚ S.A. (Law No.28840), approved by Supreme Decree No. 012-2013-EM, setting forth that each member of the General Shareholders' Meeting shall represent the number of shares of the Company's share capital resulting from dividing the total number of shares by the number of members designated to represent the Peruvian State.

The Company is registered with the Peruvian company and securities regulator (Superintendencia de Mercados de Valores, SMV).

The Company's main offices are located at Av. Enrique Canaval y Moreyra N°150, San Isidro, Lima, Peru.

Under the provisions of Law No.28840, the Company was expressly excluded from the scope of the governmental agency that provides financing to government-owned companies, (Fondo Nacional de Financiamiento de la Actividad Empresarial del Estado – FONAFE) and the public investment system (Sistema Nacional de Inversión Pública – SNIP). In addition, by means of the Second Final Provision of Law No 28840, Supreme Resolution No.290-92-PCM, by which the Company was included within the scope of the process of private investment promotion, and any other regulation opposing Law No.28840, was superseded.

The Company is governed by its Organic Law under Legislative Decree No. 43, its Bylaws, Law No. 28840 (its internal rules, approved under Supreme Decree No.012-2013-EM dated April 27, 2013); it is also governed by the Peruvian Corporate Law on a supplementary basis and is under the oversight of the Peruvian Comptroller's Office (Contraloría General de la República, CGR), supervisory entities (SMV) and regulatory entities (OSINERGMIN, OEFA, SUNAT, SUNAFIL, among others).

Likewise, under the Third Final Provision of Legislative Decree No. 1031, by which the efficiency of the government-run companies is promoted, dated June 24, 2008, the Company is subject to subsection 9.3, article 9 and article 12 of Legislative Decree No. 1031. Referring to subsection 9.3 of Article 9, the financial statements are audited annually by independent external auditors appointed by the General Shareholders' Meeting and in the case of article 12, by resolution of the General Shareholders' Meeting, the minimum level of share capital to be registered with the Securities Market Public Registry is to be determined in adherence to the provisions issued by the SMV.

The provisions of Law No. 30130 published on December 18, 2013, entitled "Law declaring the priority execution of the modernization of the Talara Refinery to ensure the preservation of air quality and public health and adopting measures to strengthen the Corporate Governance of Petróleos del Perú - PETROPERÚ S.A." also apply to it, which provides that the Company executes the Talara Refinery

Modernization Project (hereinafter, PMRT), as well as its Regulations, approved by Supreme Decree No. 008-2014-EM, published on March 24, 2014. In accordance with article 5 "Approval of the granting of guarantees" of Law No. 30130 which approves the grant by the Peruvian Government of up to US\$200 million per year and up to a cumulative total of US\$1,000 million to secure the financial obligations derived from the financing to be contracted by the Company to execute the PMRT in the event the Company is not able to obtain the necessary resources to honor its obligations. As of September 30, 2025, and December 31, 2024, the use of such guarantees has not been required.

Additionally, on December 30, 2016, Legislative Decree No. 1292 was published, which declared of public necessity and national interest the safe operation of the North Peruvian Oil Pipeline (hereinafter ONP or Pipeline) and provides for the reorganization and improvement of the Company's Corporate Governance (Note 1-e). On August 15, 2019, Law No. 30993 was published, which declared of national interest the preparation and execution of the Project for the Strengthening and Modernization of the North Peruvian Oil Pipeline, in order to guarantee the operation and efficient maintenance of the North Peruvian Oil Pipeline, expand its length, increase its transportation capacity and profitability, safeguard the conservation of the environment and complement the PMRT, as well as guarantee an adequate share of taxes, fees and royalties in favor of the State.

Finally, through Emergency Decree No.013-2024 (D.U. No.013-2024) dated September 13, 2024, extraordinary and urgent economic and financial measures were established to overcome PETROPERÚ's financial situation, ensure the commercialization of hydrocarbons nationwide, guarantee the supply of fuels for the development of economic activities nationwide, and preserve the company's sustainability. Likewise, this regulation extends until July 31, 2025, the term of the Short-Term Indebtedness Operation, under the modality of granting a National Government Guarantee, to the foreign trade credit line with Banco de la Nación (BN) for up to an amount in soles equivalent to US\$1,000 million, whose term was extended until 12.31.2028 with Law No. 32185, Public Sector Budget Law for fiscal year 2025. In addition, Emergency decree No.013-2024, established that the Company would hire the services of a specialized firm to design and manage the implementation of the Comprehensive Transformation Process which consists of executing strategic, operational and financial measures for the Company's sustainability.

b) Economic activity -

In addition, as established under Law No.28840, the Company has economic, financial and administrative autonomy in accordance with its annual and five-year business objectives approved by the Ministry of Energy and Mines. The agreements and contracts entered into in order to achieve its business purpose are subject to the guidelines established under i) Legislative Decree No.043, as amended; ii) its Bylaws; iii) its internal rules; iv) Board agreements; v) the Standards of the National Control System; and vi) the standards and regulations specific to the Company.

The Company's foreign trade transactions are governed by the generally accepted practices and uses of international trade and International Law standards as well as the generally accepted practices in the hydrocarbon and energy industry.

As part of its corporate purpose, the Company carries out activities in accordance with Law No. 26221, Organic Law that regulates the activity of Hydrocarbons in National Territory. These activities consist of all oil industry phases, such as oil trade, including its by-products, basic and intermediate petrochemicals and other forms of energy.

By means of Law No. 29970 - Law for the strengthening of the energy supply continuity throughout the Southern Region in Perú ("Ley que afianza la Seguridad Energética y promueve el desarrollo del Polo Petroquímico en el Sur del País") the Company shall take part, individually or jointly, in the petrochemical development described in the above-mentioned law.

Law No. 30130, published on December 18, 2023, authorizes the Company to sell or issue shares to be placed in the stock market. In this process, the Peruvian Government is allowed to incorporate a private stake of up to 49% of its share capital outstanding. Likewise, it is established that the Company is allowed

to carry out investment activities and projects as long as no current or future firm or contingent liabilities are incurred by the Company, do not affect the guarantees for the PMRT; and no Treasury resources are required; which is not restrictive of those ongoing projects that enable the Company to be operational at the effective date of this law. These restrictions will cease to exist whenever the Company generates sufficient cash flows to be able to secure payment of the indebtedness contracted to invest in implementing the PMRT and a private stake of at least 40% has been incorporated in its outstanding share capital.

North Peruvian Oil Pipeline -

Pursuant to Legislative Decree No. 1292, published on December 30, 2016, the safe operation of the North Peruvian oil pipeline was declared of public need and national interest; in this sense, the Company was ordered to re-organize and enhance its corporate governance, authorizing a period of 720 calendar days counted from the date of publication of said Legislative Decree, to prepare a plan that regulates, among others, the modification, execution of contracts and contracting of services related to the Company's business units; the participation of the Company in contracts of hydrocarbon exploration and exploitation; the possibility for the Company to take part in social responsibility actions under the mechanism of work in exchange for taxes; using the capital increase referred to in subsection 8.1, article 8, Law No. 29970 for the execution of the PMRT and the amendment of article 4 and the Second Complementary Provision to Law No. 28840 to implement Legislative Decree No. 1292 approved by the Board of Directors. Such plan was approved by the Board of Directors by Resolution No.067-2018-PP dated August 6, 2018. In this regard, the Company has been making disbursements for remediation work, crude oil recovery, soil monitoring and other services related to certain spills that have occurred in recent years as part of its operations (Note 17).

Lot 64 -

On September 28, 2021, Supreme Decree No.024-2021-EM approved the transfer of Geopark Perú S.A.C. (former operator) stake in Lot 64 to the Company, thereby assuming 100% of the rights and obligations for hydrocarbon exploration and exploitation. On June 16, 2024, notification was received of the approval of the terms of reference (TOR) and the citizen participation plan (CPP) by the National Environmental Certification Service for Sustainable Investments (SENACE) for the initiation of the Detailed Environmental Impact Study.

On November 29, 2024, public call No. Petroperú-001-2004-L64 was launched for the selection of a strategic partner for Lot 64. This call ended in June 2025 and was declared void. As of the date of approval of the financial statements, a direct award process has been initiated, with the purpose of inviting those considered to have the greatest projection and legal, technical, economic, and financial support.

As of September 30, 2025, and December 31, 2024, investments made in Lot 64 amount to US\$37,209 thousand and US\$35,834 thousand, respectively (Note 11).

Lot 192 -

By means of Law No. 30357, published on November 6, 2015, the Fourth Final Complementary Provision was incorporated to Law No. 30130, authorizing PERUPETRO S.A. to, after evaluation and through direct negotiation, enter into the hydrocarbon exploitation contract for Lot 192 with the Company.

Supreme Decree No. 009-2022-EM, published on July 25, 2022, authorized the signing of the License Contract for the Exploitation of Hydrocarbons for Lot 192, with a 30-year extension, which was signed by the Company and PERUPETRO S.A. on February 28, 2023.

On February 3, 2024, Supreme Decree No. 005-2024-EM was published in the official newspaper El Peruano, in which the modification of the License Contract for the Exploitation of Hydrocarbons in Lot 192 was approved, in order to reflect the transfer of contractual position of 61% participation in the Contract by the Company in favor of Altamesa Energy Perú S.A.C.

PETROPERÚ terminated its partnership with Altamesa Energy Perú S.A.C. in February 2025 and has now begun a selection process to find a new operator for the Lot 192 License Agreement.

The results of the Direct Negotiation Process for Lot 192 will be submitted to the Board of Directors for its consideration. The incorporation of the company designated in the license agreement for the exploitation of hydrocarbons in Lot 192 will be carried out in accordance with the provisions of Articles 12 and 15 of the Organic Hydrocarbons Law.

Direct negotiations were conducted with interested bidders; the chosen company is currently undergoing PERUPETRO qualification.

As of September 30, 2025, and December 31, 2024, investments made in Lot 192 amount to US\$37,163 thousand and US\$26,057 thousand, respectively (Note 11).

Lot X -

By Supreme Decree No. 008-2024-EM, published on May 19, 2024, the Company and the consortium formed by OIG PERU S.A.C, Aguaytía Energy del Perú S.R.L. and Termoselva S.R.L. signed with PERUPETRO S.A. the License Contract for the Exploitation of Hydrocarbons in Lot X (Talara), for a term of 30 years. The license contract came into effect on Monday, May 20, 2024, PETROPERÚ has a 40% stake in the lot, with OIG PERU S.A.C being designated as operator.

The average production of oil and associated natural gas corresponding to PETROPERÚ's participation, as of September 30, 2025, was 3,338 barrels of oil per day (hereinafter BOPD) and 7,024 million cubic feet per day (hereinafter MPCD), respectively, and during 2024, it was 3,028 BOPD and 4,746 MPCD, respectively.

Other lots -

By Supreme Decree No. 022-2023-EM, published on October 21, 2023, the License Contract between the Company and PERUPETRO S.A. for the Exploitation of Hydrocarbons in Lot I was approved, for a period of 2 years, said agreement being signed on October 21, 2023, or until the effective date of a new contract for the exploitation of hydrocarbons.

In Lot I, the average production of oil and associated natural gas, as of September 30, 2025, was 465 BOPD and 2,693 MPCD, respectively, and during 2024, it was 469 BOPD and 2,474 MPCD, respectively.

Likewise, on October 21, 2023, the Company and PERUPETRO S.A. signed the License Contract for the Exploitation of Hydrocarbons for Lot VI, with a 2-year extension, approved by Supreme Decree No. 023-2023-EM published on October 21, 2023, or until the effective date of a new contract for the exploitation of hydrocarbons.

In Lot VI, the average production of oil and associated natural gas, as of September 30, 2025, was 1,617 BOPD and 3,646 MPCD, respectively, and during 2024, it was 1,746 BOPD and 3,220 MPCD, respectively.

By Supreme Decree No. 027-2023-EM, published on November 13, 2023, the License Contract between the Company and PERUPETRO S.A. for the Exploitation of Hydrocarbons in Lot Z-69 was approved for a period of 2 years (or until the effective date of a new contract for the exploitation of hydrocarbons), said contract being signed on November 15, 2023.

In Lot Z-69, the average production of Oil and Associated Natural Gas, as of September 30, 2025, was 3,183 BOPD and 9,268 MPCD, respectively, and during 2024 it was 4,508 BOPD and 9,194 MPCD, respectively.

c) Regulatory framework for the Company's selling prices -

In accordance with article 77 of the Organic Hydrocarbon Law, the activities and prices of crude oil and by-products are governed by supply and demand.

- The Company's fuel pricing policy approved by its Board of Directors establishes the following:
 - The prices of liquid fuels and specialties are determined according to their supply and demand, in compliance with the provisions of the Organic Hydrocarbons Law and regulations that modify or replace it.
 - The prices list of liquid fuels and specialties will be approved by the Executive Price Committee chaired by the General Manager and made up by the Corporate Finance Manager, Corporate Supply Chain Manager, Corporate Operations Manager and Corporate Commercial Manager or those that assume their functions.
 - The determination of the prices of liquid fuels and specialty products that the Company sells in the local market will consider the opportunity cost and will be set at prices that allow the Company to compete in the market while achieving its strategic and budgetary goals. In the case of liquid fuels, the opportunity cost corresponds to the Import Parity Price (IPP) calculated using the methodology defined by the Company in its guidelines.
 - The Company's liquid fuel prices list must be competitive with other economic agents - producers and importers - in the Sales Plants of the country in which there is commercial operation, provided that there is commercial benefit.
 - In the event of international market events or developments that significantly impact the prices of liquid fuels and specialty products, either sharply upwards or downwards, which negatively affect the Company's reputational image or place it at potential economic risk, the Executive Pricing Committee may decide to gradually pass these changes on to customers or to cancel the short-term variations until the local or international market stabilizes, taking into account the Company's financial sustainability.
- Fund for the Stabilization of Petroleum-Derived Fuels Prices (hereinafter referred to as the Price Stabilization Fund).

The Price Stabilization Fund was created by the Peruvian Government by Emergency Decree No. 010-2004, as amended. Pursuant to this piece of legislation the Peruvian Government establishes a contingency fund to prevent the volatility of the hydrocarbon prices being transferred to the final consumers; however, the Ministry of Energy and Mines (MEM) will compensate the Company for the pricing differences that are not transferred to its clients.

In accordance with these regulations, the General Directorate of Hydrocarbons (DGH) of the Ministry of Energy and Mines establishes a price range for each fuel product marketed in the country. Article 6 of Supreme Decree No. 133-2010-EF (dated June 23, 2010) stipulates that the Regulatory Agency for Investment in Energy and Mining - OSINERGMIN shall update and publish every two months in the Peruvian official newspaper "El Peruano", the price ranges of each product the last Thursday of the second month, computed from the effective date of the last price update.

On a weekly basis, OSINERGMIN publishes for each fuel product marketed in the country a reference price called Import Parity Price (Precio de paridad de importación, PPI). When the PPI is higher than the range upper limit, the difference constitutes the Compensation Factor and when the PPI is lower than the range lower limit, the difference constitutes the Contribution Factor.

As of December 31, 2024, and September 30, 2025, the products subject to the Price Stabilization Fund are industrial oil 6 and Diesel BX.

As of September 30, 2025, the Price Stabilization Fund represented -0.49% of the Company's revenues (contribution) and -0.27% of revenues as of September 30, 2024 (contribution).

d) Operational income -

The Company's results show a net loss of US\$355,003 thousand as of September 2025, lower than the loss of US\$745,383 thousand as of September 2024, mainly due to:

Favorable factors

- Higher sales volume recorded in the domestic market, mainly of Diesel and Gasoline, in line with the sales and market share recovery process, which has been progressively achieved since mid-2024.
- Increased production of low sulfur diesel, Gasoline and Turbo A1 at the New Talara-NRT Refinery.
- Lower volume of residual exports, in accordance with NRT's current production scheme. It should be noted that the market value of this product is lower than the acquisition cost of the raw material.
- Lower operating expenses net of self-consumption by US\$ 102 MM, mainly due to the lower recording of depreciation of assets, associated with the review of the useful life of NRT's assets and the optimization of the Company's expenses.
- Lower net financial expenses by US\$ 50 MM, explained by lower expenses for direct obligations with suppliers and lower interest for working capital.
- Favorable Deferred Income Tax of US\$47 MM, contrary to that recorded in September 2024 (- US\$35 MM), which corresponds to the deferred tax generated by the fluctuation of the exchange rate (3.476 as of September 2025 vs. 3.77 as of December 24) affecting non-monetary items (mainly Property, plant and equipment), due to the fact that the Company pays income tax in a different currency (soles) than its functional currency (US\$).
- Net Profit of US\$34 MM, generated by the operation of the Northwest lots (Lot I, VI, Z-69 and X).

Unfavorable factors:

- Operational restrictions derived from port closures due to abnormal waves, which had an impact on NRT's operation and did not allow the normal supply of crude oil to the refinery and the normal supply of its production to terminals and plants.
- The downward trend in international crude oil and product prices impacting inventory realization.
- The commercialization of crude oil in the months of January and February, due to operational restrictions in the NRT crude oil reception system, derived from the environmental event at the Submarine Terminal and port closures due to abnormal waves.

e) Going concern and working capital -

The financial statements as of September 2025 and December 2024 have been prepared under the going concern basis assumption, which assumes that the Company will continue its operations in the foreseeable future on a normal manner.

f) Approval of financial statements -

The interim financial statements for the nine-month period ended on September 30, 2025, have been approved by the Company's General Management on October 31, 2025. The financial statements as of December 31, 2024, have been issued with the authorization of the General Management on June 30, 2025 and approved by the Board of Directors on the same date.

2 BASIS OF PREPARATION OF THE FINANCIAL STATEMENTS

The principal accounting policies applied in the preparation of these financial statements are set out below. These principles and practices have been applied consistently throughout the periods presented, unless otherwise indicated.

2.1 Basis of preparation and presentation -

i) Compliance with IFRS -

The Company's financial statements have been prepared in accordance with International Financial Reporting Standards (hereinafter, IFRS), issued by the International Accounting Standards Board (hereinafter, IASB), in effect at the date of the financial statements. The information contained in these financial statements is the responsibility of the Company's Management, which expressly states that in preparing them it has applied all accounting principles and criteria required under the IFRS issued by the IASB.

ii) Measurement bases -

The financial statements have been prepared under the historical cost convention. The financial statements are presented in thousands of US Dollars, unless a different monetary expression is indicated.

The preparation of financial statements in accordance with IFRS requires the use of certain critical accounting estimates. It also requires Management to exercise its judgment in the process of applying the Company's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note 4.

iii) New standards and amendments effective for financial statements for annual periods beginning on January 1, 2024, which have been evaluated and applied by the Company -

Under IFRS, certain accounting changes have been made that are effective as of January 1, 2024. These changes have been considered by the Company in preparing the 2024 financial statements. These accounting changes are summarized as follows:

- Amendments to IAS 1 - Classification of liabilities as current or non-current.
- Amendment to IFRS 16 - Sales and leasebacks.
- Amendments to IAS 7 and IFRS 7 - Supplier Financing Arrangements.

The amendments to the standards and interpretations listed above have had no impact on the Company's financial statements for prior years or the current year; furthermore, they are not expected to have a material impact on the financial statements for future periods.

In addition, certain standards, amendments to standards and interpretations have been published that are mandatory in years subsequent to 2025:

- Amendments to IAS 21 - Lack of Interchangeability.
- Amendments to IFRS 9 and IFRS 7 - Amendments to the Classification and Measurement of Financial Instruments.
- IFRS 18 - Presentation and Disclosures in Financial Statements.
- IFRS 19 - Subsidiary without public accountability: Disclosures.
- Improvements to IFRS 2024 - Volume 11.
- Amendments to IFRS 10 and IAS 28 - Sale or contribution of assets between an investor and its associate or joint venture.

The amendments to the standards and interpretations listed above have had no impact on the Company's financial statements for prior years or the current year; furthermore, they are not expected to have a material impact on the financial statements for future periods.

2.2 Cash and cash equivalents -

Cash and cash equivalents presented in the statement of financial position, and for the purposes of preparing the statement of cash flows, include cash in bank current accounts and fixed funds. Time deposits with original maturities greater than three months from the date of placement do not constitute cash equivalents for purposes of preparing the statement of cash flows and are presented as funds subject to restriction under other accounts receivable in the statement of financial position.

2.3 Financial assets -

Classification and initial measurement -

The Company classifies its financial assets in the following categories:

- Measured at fair value (either through profit or loss or other comprehensive income), and
- Measured at amortized cost.

The classification depends on the business model the Company uses to manage its financial assets and the contractual terms that impact cash flows.

Financial assets are not reclassified after their initial recognition, unless the Company changes its business model for managing them.

The Company measures financial assets at amortized cost, which are subsequently measured using the effective interest method and are subject to impairment. Gains and losses are recognized in income when the asset is derecognized, modified or impaired.

The Company's financial assets include cash and cash equivalents, trade receivables and other receivables, which are measured at amortized cost.

Interest income is recognized on loans receivable based on the proportion of time elapsed, using the effective interest method. When the loan or receivable is impaired, the Company reduces the carrying value to its recoverable amount, with future cash flows discounted at the original interest rate.

Subsequent measurement -

Debt instruments -

Subsequent measurement of debt instruments depends on the business model that the Company has established for the management of the asset, as well as the characteristics of the asset flows derived from the asset. There are three possible categories into which debt instruments can be classified, these are:

- Amortized cost.
- Fair value through other comprehensive income (FVTOCI).
- Fair value through profit or loss (FVTPL).

As of September 30, 2025, and December 31, 2024, the Company only holds debt instruments at amortized cost.

Amortized cost is applicable for assets whose business model is to collect contractual cash flows, provided that these cash flows only represent payments of principal and interest. Interest earned on these financial assets is recognized as financial income using the effective interest method. Any gain or loss arising from the derecognition of this type of financial asset is recognized in profit or loss and presented under "Other income" or "Other expenses" together with the associated exchange gains or losses. Impairment losses on financial assets are presented under "Selling and distribution expenses".

Derecognition -

A financial asset (or, if applicable, part of a financial asset or part of a group of similar financial assets) is derecognized, i.e., eliminated from the separate statement of financial position when:

- The contractual rights to receive the cash flows generated by the asset have expired; or
- The Company has transferred its rights to receive the cash flows generated by the asset, or retains the contractual rights to receive the cash flows from the financial asset, but has assumed the contractual obligation to pay them to one or more recipients, agreed upon without significant delay, through an intermediary arrangement; and (a) substantially all of the risks and rewards of ownership of the asset have been transferred; or (b) substantially all of the risks and rewards of ownership of the asset have not been transferred or retained, but control of the asset has been transferred.

Trade receivables -

Trade receivables are amounts owed to the Company by customers for items sold or services rendered in the ordinary course of business. If collection is expected in one year or less, they are classified as current assets. If not, they are presented as non-current assets.

Trade receivables are initially recognized at their fair value and are subsequently measured at their amortized cost using the effective interest method, less the provision for impairment.

2.4 Inventories -

Inventories are valued at cost or net realizable value, whichever is lower. Cost includes direct material costs, direct labor costs, manufacturing overhead (based on normal production capacity), and costs incurred in moving inventory to its location and condition necessary for sale or use, and excludes financing costs and exchange rate differences. The cost of crude oil and acquired derived products is determined using the first-in / first-out method. Refined in-process and finished products are determined at the combined production cost. Materials and supplies at weighted average cost. Inventories receivable at specific acquisition cost. The volume of crude oil acquired and held in the pipeline is recorded at acquisition cost.

The provision for inventories impairment of in-process refined products, finished products and by-products acquired is applied directly to the carrying amount of inventories, with a charge to cost of sales; the carrying amount of these inventories is reduced to their net realizable value in the same period. Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

With respect to supplies, the Company makes an annual provision for obsolescence based on a technical study or considering those items with no movement for more than two years; said estimated provision is recognized with a charge to income in the corresponding period.

2.5 Property, plant, and equipment -

Property, plant and equipment are stated at cost less accumulated depreciation and, if any, accumulated impairment losses. The cost of an item of property, plant and equipment comprises its purchase price or its construction or manufacturing cost, including non-refundable purchase duties and taxes and any necessary costs, the initial estimate of the obligation to dismantle the asset and, in the case of assets that require substantial time to be ready for their intended use (qualifying assets), indebtedness costs (Note 2.11). The purchase price or construction cost corresponds to the total of the amount paid and the fair value of any other consideration given in the acquisition of the asset. Items of property, plant and equipment are recognized at the major component level.

Costs incurred to replace a component of an item or element of property, plant and equipment are capitalized separately if the qualifying criterion is met and the carrying amount of the component being replaced is written down.

Subsequent costs attributable to fixed assets are capitalized only when it is probable that future economic benefits associated with the asset will be generated for the Company and the cost of these assets can be measured reliably, otherwise they are recorded as an expense.

Assets under construction are capitalized as a separate component. Cost recognition will end when the item is ready for use in the conditions necessary to operate as intended by the Company, and from this moment on, they are subject to depreciation. When the items are ready for use, they are transferred to their final category.

The cost of property, plant and equipment, net of their residual value, is depreciated over their useful lives. Depreciation of assets is recognized as a cost or expense depending on the function of the asset.

Land is not depreciated. Depreciation is calculated using the straight-line method over the estimated useful life of each asset, which is as follows:

	<u>Years</u>
Buildings and other constructions	Between 25 and 60
Machinery and equipment	Between 2 and 50
Storage tanks	Between 20 and 40
Transportation units	Between 5 and 15
Miscellaneous equipment	Between 3 and 50
Computer equipment	Between 3 and 8
Furniture and fixtures	Between 2 and 20

The residual values, useful lives of assets and depreciation methods applied are reviewed and adjusted, if necessary, at the date of each statement of financial position. Any changes in these estimates are adjusted prospectively.

Items of property, plant and equipment are derecognized upon sale or when no economic benefits are expected from their use or subsequent sale.

The carrying amount of property, plant and equipment is written off immediately to its recoverable amount if the carrying amount of the asset is greater than the estimated recovery as described in note 2.7.

Gains and losses on the sale of assets correspond to the difference between the proceeds of the transaction and the carrying value of the assets. These are included in the statement of comprehensive income.

The accounting treatment of the capitalization of interest related to qualifying assets is described in note 2.11.

Assets received by donation or transfer are recorded at their fair value as part of the assets, with a counterpart entry in the other income item in the statement of comprehensive income. During 2024 and 2023, the Company did not receive significant donations.

Assets received from the signing of license contracts for the exploitation of hydrocarbon lots are not recognized in the financial statements.

2.6 Intangible assets and other -

Software -

Intangible assets include acquired computer software licenses and software, which are capitalized based on costs incurred to acquire and put the specific software to use. These costs are amortized over their estimated useful lives (between three and ten years).

Costs associated with software maintenance are recognized as expenses when incurred.

Development costs that are directly attributable to the design and testing of identifiable and unique software products controlled by the Company are recognized as intangible assets when the following criteria are met:

- It is technically feasible to complete the software so that it will be available for use.
- The Company intends to terminate the software and to use or sell it.
- There is an ability to use or sell the software product.
- It can be demonstrated that the software is likely to generate future economic benefits.
- The technical, financial, and other resources necessary to complete the development of the software are available to enable its use or sale, and the cost attributable to the software during its development can be reliably measured.

Direct costs that are capitalized as part of the cost of computer software include the costs of the employees who develop the software and a portion of the related indirect costs.

Hydrocarbon exploration activities -

Exploration costs such as seismic and drilling of exploratory wells are capitalized until the technical and commercial feasibility of extracting resources from the area is demonstrated.

If exploration and resource evaluation activities are deemed to be unsuccessful, such assets are charged to income by recognizing an impairment loss in the statement of comprehensive income. In the event that viable reserves are identified, exploration and evaluation assets are reclassified from this category to development costs, after evaluating their recoverability. Depreciation is not recognized during the exploration and evaluation phase.

If events or circumstances indicate that a possible impairment of resource exploration and evaluation assets has occurred, their recoverability is assessed by grouping assets at the lowest levels for which there are separately identifiable cash flows, cash-generating units, based on considerations that include geographical areas of similar geological characteristics, common use of facilities and contractual agreements. Such events and circumstances include the interpretation of seismic data, areas return requirements, drilling results, remaining period to comply with the exploration commitment period, remaining capital investment plans and political and market conditions.

2.7 Impairment of non-financial assets of indefinite useful lives -

The Company assesses impairment under the provisions of International Accounting Standard (IAS) 36 "Impairment of assets"; to this end, the Company performs annual tests of impairment of its items of property, plant and equipment, intangible assets, investment property and right-of-use assets to determine whether there are indications that said items are impaired. If there is any indication of impairment, the recoverable amount of the asset is calculated in order to determine the amount of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the Cash Generating Unit (CGU) to which the asset belongs. For purposes of assessing impairment, assets are grouped at the smallest levels at which identifiable cash flows (CGUs) are generated. Provided that consistent and reasonable criteria of asset allocation are used, common assets are also allocated to individual CGU; or otherwise to the smallest groups of CGU identified on a consistent and reasonable basis.

The recoverable amount of an asset or CGU represents the higher of its value in use and its fair value less direct costs to sell. For purposes of calculating the recoverable amount, the Company determines the value in use of its assets subject to impairment testing. Value in use corresponds to the present

value of estimated cash flows discounted to their present value, using a pre-tax discount rate that reflects current market conditions and the specific risks of each asset or CGU.

Impairment losses, calculated by reference to the recoverable amount of the assets, which have been recognized in prior years, are reversed if there is a change in the estimates used when the impairment loss was last recognized.

Impairment losses are recognized in income in the expense categories to which the function of the impaired asset corresponds.

2.8 Financial liabilities -

The Company classifies its financial liabilities in the following categories: i) financial liabilities at fair value through profit or loss and ii) other financial liabilities measured at amortized cost. The classification depends on the purpose for which the liabilities were assumed and the manner in which they are managed. The Company determines the classification of its financial liabilities at the date of initial recognition.

As of September 30, 2025, and December 31, 2024, the Company maintains liabilities in the “other financial liabilities measured at amortized cost” category which are measured using the effective interest rate method. Gains and losses are recognized in the statement of comprehensive income when liabilities are derecognized, as well as through the amortization process according to the effective interest rate method.

Amortized cost is calculated by considering any acquisition discounts or premiums and any fees or costs that are an integral part of the effective interest rate. Amortization according to the effective interest rate method is recognized as financial cost in the statement of comprehensive income.

As of September 30, 2025 and December 31, 2024, the Company maintains within the category of “other financial liabilities measured at amortized cost” the following: (i) corporate bonds, (ii) unsecured bank loans, (iii) CESCE loan, (iv) trade accounts payable, (v) accounts payable to related entity, (vi) some items included in other accounts payable and (vi) lease liabilities.

Likewise, the Company maintains liabilities for derivative financial instruments which are measured and classified at fair value through profit or loss (Note 2.21).

For financial liabilities measured at fair value through profit or loss, changes in the fair value of these liabilities are recognized as a gain or loss in income or loss and presented under “financial income or expenses” in the period in which the change occurs.

2.9 Trade payables -

Trade payables are payment obligations for goods or services acquired from suppliers in the normal course of business. Accounts payable are classified as current liabilities if payment is due within one year or less (or in the normal operating cycle of the business if longer), otherwise they are presented as non-current liabilities.

Accounts payable are initially recognized at fair value and, subsequently, if the time value of money is relevant, are measured at amortized cost using the effective interest method; otherwise, they are shown at nominal value.

2.10 Financial obligations -

The financial obligations correspond to loans acquired from financial institutions and related parties, including unsecured short-term loans used for working capital and investment in the NRT (formerly PMRT), corporate bonds, a CESCE loan, a loan received from the Ministry of Economy and Finance,

and liquidating instruments. Loans are classified according to the content of the contractual agreements entered into and taking into account the economic substance of the contract.

Loans held by the Company are initially recognized at fair value, net of transaction costs incurred. These obligations are subsequently recorded at amortized cost; any difference between the proceeds received (net of transaction costs) and the redemption value is recognized in the statement of comprehensive income during the period of the loan using the effective interest rate method. The Company presents its financial obligations under other financial liabilities and accounts payable to related parties.

Fees and commissions incurred in obtaining loans are recognized as transaction costs to the extent that it is probable that some or all of the loan will be received. In this case, transaction costs are deferred until the loan is received. To the extent there is no evidence that it is probable that part or all of the loan will be received, fees are capitalized as payments for services to obtain liquidity and are recognized in earnings over the period of the credit line to which they relate.

Loans are derecognized from the statement of financial position when the obligation specified in the contract expires or is cancelled. The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including non-cash assets transferred or liabilities assumed, is recognized in profit or loss as other financial income or expense.

Loans are classified as current liabilities unless the Company has an unconditional right to defer payment of the obligation for at least 12 months from the statement of financial position date.

2.11 Cost of borrowing -

General and specific borrowing costs that are directly attributable to the acquisition, construction, or production of assets that take a substantial period of time to be ready for their expected use or sale (qualifying assets) are attributed to the cost of those assets. Capitalization begins when the activities necessary to prepare the asset for its expected use are initiated and disbursements and financing costs are incurred, and ends when the asset is substantially ready for its expected use or sale. The Company has defined a substantial period of time as one year or more for the purposes of capitalizing borrowing costs into qualifying assets.

Income generated by the temporary investment of funds received from specific loans is deducted from capitalizable borrowing costs. Other borrowing costs are recognized in income.

2.12 Leases -

The Company leases mainly real estate, marine transportation units and miscellaneous equipment. Lease contracts do not impose any performance obligations, other than the security of the leased assets, which are maintained by the lessor. Leased assets cannot be used as collateral for lending purposes.

Leases are recognized as a right-of-use asset and a corresponding lease liability at the date the leased asset is available for use by the Company.

Assets and liabilities arising from a lease contract are initially measured at present value. The amount of the initial measurement of the lease liability is made on the basis of fixed payments.

Right-of-use assets are generally depreciated on a straight-line basis over the shorter of the asset's useful life and the lease term. If the Company is reasonably certain to exercise a purchase option, the right-of-use asset is depreciated over the useful life of the underlying asset.

Payments associated with short-term leases and leases of low-value assets are recognized under the straight-line method as an expense in income. Short-term leases are leases with a lease term of 12 months or less. Low-value assets include computer and telecommunications equipment and small items of office furniture.

Lease payments to be made under renewal options that are reasonably certain to be exercised are also included in the measurement of the liability.

Lease payments are discounted using the interest rate implicit in the lease contract, if determinable, or the Company's incremental interest rate, which is the interest rate the lessee would have to pay to borrow the funds necessary to obtain an asset of similar value to the right to use asset in a similar economic environment with similar terms, guarantees and conditions.

To determine the incremental interest rate, the Company uses recent third-party financing received by the lessee as a starting point, adjusted to reflect changes in financing terms since the third-party financing was received.

The Company is exposed to potential future increases in variable lease payments based on an index or rate, which are not included in the lease liability until they take effect. When adjustments to lease payments based on an index or rate become effective, the lease liability is revalued and adjusted to the right-of-use asset.

Lease payments are allocated between principal and finance cost. The finance cost is charged to income during the lease term, in order to produce a constant periodic interest rate on the remaining balance of the liability for each period.

In determining the lease term, the Company considers all facts and circumstances that create an economic incentive to exercise an extension option, or not to exercise a termination option. Extension options (or post-termination periods) are only included in the terms of the lease if it is reasonably certain that the lease will be extended (or not terminated).

Accounting policy as lessor -

A lessor shall classify each of its leases as either an operating lease or a finance lease.

A lease is classified as a finance lease when it transfers substantially all the risks and rewards incidental to ownership of an underlying asset. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership of an underlying asset.

Revenues from operating leases in which the Company is a lessor are recognized in income under the straight-line method over the lease term. Initial direct costs incurred in obtaining an operating lease are added to the carrying amount of the underlying asset and are recognized as an expense over the lease term on the same basis as lease income. The respective leased assets are included in the statement of financial position based on their nature.

The Company maintains real estate leased to third parties, which are classified as operating leases and are presented in the statement of financial position under investment properties. Income from these leases is presented in the statement of comprehensive income in other operating income.

2.13 Employee benefits -

a) Bonuses -

The Company recognizes the expense for bonuses and the corresponding liability on the basis of the legal provisions in force; bonuses correspond to two annual remunerations paid in July and December of each year, respectively. Bonuses are recognized based on the proportion of time in which the worker provides the services that entitle him or her to this benefit.

b) Compensation for time of service -

The compensation for time of service of the Company's personnel corresponds to their severance payment rights calculated in accordance with current legislation, which must be deposited in the bank

accounts designated by the employees in the months of May and November of each year. Compensation for employee time of service is equivalent to average compensation in effect at the date of deposit, which is recognized in income on an accrual basis. The Company has no additional payment obligations once it makes the annual deposits of the funds to which the employee is entitled.

c) Vacations -

Annual personnel leave is recognized on an accrual basis. The provision for the estimated obligation for annual employee leave resulting from services rendered by employees is recognized at each statement of financial position date. The annual leave to which the employee is entitled is 30 calendar days.

d) Profit sharing -

The Company recognizes a liability and an expense for employee profit sharing based on current legal provisions. Employees' profit sharing is 10% of the taxable income determined by the Company in accordance with income tax legislation.

2.14 Provisions -

Provisions are recognized when the Company has a present obligation, legal or assumed, that results from past events, is likely to require the outflow of resources involving economic benefits for its settlement, and its amount can be reliably estimated.

Provisions are reviewed at the end of each period. If the time value of money is significant, provisions are discounted using a pre-tax rate that reflects, where appropriate, the specific risks of the liability. The unwinding of the discount due to the passage of time results in an increase in the obligation, which is recognized in the statement of comprehensive income as a financial expense. Provisions are not recognized for future operating losses.

Provision for environmental improvements and plugging of wells of privatized operating units -

The obligation to improve the environment and plug wells arises from the operating units transferred by the Peruvian State to the private sector in 1997 and from a specific legal mandate. The Peruvian State, through the Company, assumed responsibility for covering these obligations. In this respect, the Peruvian State reimburses the Company for the disbursements it incurs to meet these obligations. The obligation assumed by the Peruvian State was recognized against the income of prior years. The amount accrued at that date is updated at the end of each year.

On the date of initial recognition of the liability arising from this obligation, measured at the present value of the estimated disbursement flows, the same amount was simultaneously debited to the statement of comprehensive income. Subsequently, the liability is reviewed and increased, if applicable, each period. Upon settlement of the liability, the Company recognizes any gain or loss generated. Changes in the estimated value of the initial obligation and in interest rates are recognized in the statement of comprehensive income.

2.15 Contingent liabilities and assets -

A contingent liability is disclosed when the existence of an obligation will only be confirmed by future events or when the amount of the obligation cannot be measured with sufficient reliability. Contingent assets are not recognized and are disclosed if it is considered probable that an inflow of economic benefits will occur to the Company.

By their nature, contingencies will only be resolved when one or more future events occur or fail to occur. The determination of contingencies inherently involves the exercise of judgment and the calculation of estimates of the outcome of future events.

2.16 Current and deferred income taxes -

The income tax expense for the period comprises current and deferred income tax. The tax is recognized in the statement of comprehensive income, except when it relates to items recognized directly as part of other comprehensive income or in equity. In this case, the tax is also recognized as part of other comprehensive income or directly in equity, respectively. The current income tax charge is calculated on the basis of tax legislation enacted or substantively enacted at the date of the statement of financial position. The Company periodically evaluates the position taken in tax returns with respect to situations where tax laws are subject to interpretation. The Company, when applicable, establishes provisions for amounts expected to be paid to the tax authorities.

Deferred income tax is recorded using the liability method, recognizing the effect of temporary differences that arise between the tax base of assets and liabilities and their balances in the financial statements. Deferred income taxes are determined using tax rates (and legislation) that have been enacted at the date of the statement of financial position and are expected to apply when the deferred income taxes are realized or paid.

Deferred income tax assets are recognized only to the extent that it is probable that future taxable profits will be available against which the temporary differences can be utilized.

Deferred income tax assets and liabilities are offset when there is a legal right to offset the current income tax asset against the current income tax liability and when the deferred income tax assets and liabilities relate to the same tax authority.

For the recognition and measurement of current and deferred income tax, the Company has assessed the existence of probable uncertain tax positions assumed by the Company; however, the Company has not identified any significant uncertain tax positions that require accounting.

2.17 Capital -

Subscribed and paid-in common shares are classified in equity as share capital. Shareholder's cash capital contributions and capitalization of profits or debts for which shares have not yet been issued and subscribed are recognized in equity as additional capital when they are made and approved by the shareholders and, in the case of cash contributions pending subscription and issuance of the corresponding shares, when the cash is received.

2.18 Revenue recognition -

a) Revenue from sale of refined products -

The Company mainly sells its refined products in the local market and a smaller portion is exported. Sales revenue is recognized when control of the products is transferred at a point in time, which occurs when the product is delivered to the customer and there are no outstanding performance obligations to be satisfied that would affect customer acceptance of the product. In the case of products sold in the local market, the product is considered delivered upon delivery of the goods to the Company's plants and sales terminals, and in the case of exported products, based on the contractual export terms, which primarily result in control being transferred when the product is delivered at the port of shipment.

Revenue from these sales is recognized based on the price list referenced in the contract, net of estimated volume discounts. In certain cases, products are sold with retroactive volume discounts based on cumulative sales over a 12-month period. Historical information is used to estimate and record discounts, recognizing revenue only to the extent that it is highly probable that a significant future reversal will not occur. Discounts are presented net of the trade receivables balance, based on the estimated volume discount that will be offset against customers through invoices for sales made. It has not been necessary to separate any financing components because sales are agreed upon with credit terms of no more than 45 days, which is consistent with market practice.

b) Revenue from Price Stabilization Fund (Note 1-c) -

Revenue derived from the Price Stabilization Fund are recognized simultaneously with the revenue from sales to customers of the refined products comprising the Price Stabilization Fund, for which the Directorate General of Hydrocarbon (DGH) of the Ministry of Energy and Mines sets a price range. The Company's price-setting policy is using as a reference the Import Price Parity (IPP); nevertheless, the price billed to customers must be within the price ranges set for the products within the scope of the Fund.

In accordance with the provisions of Emergency Decree No. 010-2004, whenever the Company's price is above the upper price range threshold, the Company records revenue and the respective receivable from the Ministry of Energy and Mines (MEM), for the amount equivalent to the difference between the price billed to customers and the upper price range threshold, since this is a compensating factor; whenever the Company's price is below the lower price range threshold, the Company recognizes a reduction in revenue and the receivables from MEM, for the amount equivalent to the difference between the price billed to customers and the lower price range threshold, since this is a contribution factor.

Income from the Price Stabilization Fund is recognized as part of income from ordinary activities.

c) Revenue from services rendered -

The Company provides services at fixed prices as contractually established.

Revenue from services rendered is recognized when control of the service is transferred to the customer. For terminal operation services, freight, supply and use of hydrocarbons, the transfer of control occurs as the service is rendered and there are no pending obligations to be satisfied that could affect the customer's acceptance of the service (income recognized over time). For crude oil transportation and other services, the transfer of control occurs over time, as it satisfies performance obligations as the service is provided.

d) Interest income -

Interest income is recognized on a time-proportion basis using the effective interest method.

2.19 Earnings (loss) per share -

Basic earnings (loss) per share are calculated by dividing the profit or loss attributable to the Company's shareholders by the weighted average number of common shares outstanding during the year.

2.20 Recognition of sales costs and expenses -

The cost of sales of products and services is recorded in income when the products are delivered or services are rendered, simultaneously with the recognition of revenue in accordance with accounting policies. Freight and transportation expenses related to the delivery of products are presented as part of cost of sales.

Administrative, selling, and other expenses are recognized as they are incurred, regardless of when they are paid, and are recorded in the periods to which they relate.

2.21 Derivative financial instruments -

Derivative financial instruments such as forward contracts are used to hedge foreign currency (U.S. dollar) risks. These derivative financial instruments are initially recognized at their fair values at the date the derivative contract is entered into and subsequently remeasured at fair value. Derivatives are accounted for as financial assets when their fair value is positive, and as financial liabilities when their fair value is negative. The change in fair value is recognized in the "Financial income or expenses" line

item in the statement of comprehensive income. As of September 30, 2025, and December 31, 2024, the Company has not carried out financial derivative transactions to hedge exchange rate risk (Note 3.1).

2.22 Segment information (Note 5) -

Segment information is presented in a manner consistent with internal information provided to the Board of Directors, which represents the highest authority for decision-making, resource allocation, and performance evaluation of the operating segments.

An operating segment is defined as a component of an entity for which separate financial information is maintained and continually evaluated.

3 FINANCIAL RISK MANAGEMENT

Management is responsible for establishing and supervising the risk management structure. The Corporate Finance Management is in charge of financial risk management. This Management identifies, evaluates, and manages financial risks.

The Company's financial risk management policies are established to identify and analyze the risks faced by the Company, to set appropriate risk limits and controls, and to monitor these risks and compliance with the limits. The policies and systems for managing this type of risk are regularly reviewed to reflect any changes in market conditions and the Company's activities.

3.1 Financial risk factors -

The Company's activities expose it to a variety of financial risks: market risks (primarily exchange rate risk, interest rate risk, and crude oil price risk), credit risk, and liquidity risk.

a) Market risks -

The most relevant market risks for the Company's current activities are explained below:

i) Exchange rate risk -

Transactions in currencies other than the functional currency (foreign currencies) are mainly in soles, euros, and yen. The Company is exposed to the risk of severe fluctuations in the exchange rate of these currencies.

The Company manages exchange rate risk, seeking a balance between foreign currency assets and liabilities. As of September 30, 2025, and December 31, 2024, the Company has not entered into financial derivative transactions to hedge the exchange rate risk and therefore assumes this risk.

These items have been converted to the functional currency using the exchange rates published by the Superintendency of Banking and Insurance and AFP-SBS. The following exchange rates were applied for each type of currency:

	Exchange rates	
	As of September 30, 2025	As of December 31, 2024
S/	0.288	0.265
EUR	1.231	1.120
JPY	0.007	0.000

As of September 30, 2025, and December 31, 2024, the Company recorded a net foreign exchange gain of US\$5,763 thousand and US\$11,213 thousand, respectively, which are shown in foreign exchange gain, net, in the statement of comprehensive income.

ii) Interest rate risk -

The Company maintains certain assets that earn interest at fixed market rates.

Interest rate risk for the Company arises from its short and long-term indebtedness. Variable-rate borrowing exposes the Company to interest rate risk on its cash flows. Fixed-rate borrowing exposes the company to interest rate risk on the fair value of its liabilities. The Company's policy is to maintain its indebtedness in fixed rate instruments. In this regard, the Company assumes interest rate risk on the fair value of its short and long-term loans.

As of September 30, 2025, and December 31, 2024, all of the debt the Company maintains is to finance its operations and for the completion of the PMRT project at fixed rates in accordance with the following: (i) bullet bonds whose interest is paid semi-annually since December 2017 at rates of 4.750% and 5.625% maturing in the years 2032 and 2047, respectively; (ii) CESCE loan at a rate of 3.285%, whose interest is paid semi-annually since May 2019 with maturity in 2030; (iii) short-term unsecured bank loans at rates in U.S. dollars between 7.46% and 10.58% and (iv) Cancellation documents issued by the Ministry of Economy and Finance (MEF) according to emergency decree No. 010-2022 at rates in soles between 5.00% and 6.75%; and according to emergency decree No. 013-2024 the assumption of the debt of December 2024 at a rate of 6.32% and the debt for the honoring of guarantees at a rate of 6.32%+1%, v) Long-term working capital financing with Banco de la Nación at a rate in soles of 5.55%

iii) Crude oil price risk (commodities) -

The sales prices of the products offered by the Company are exposed to the commercial risks inherent in volatility in international prices. The prices invoiced by the Company are modified according to changes in international prices (Note 1-c).

As explained in Note 1-c, prices in the domestic market are determined by considering international prices for crude oil and derivative products. Prices are expressed in soles at the current exchange rate, considering the legal regulations issued in previous years establishing the Price Stabilization Fund, through which the Peruvian State may provide compensation or receive contributions to stabilize the price of certain products for end consumers. This mechanism mitigates the effect of changes in the prices of some products that are not passed on to the final consumer.

Note 7 shows the net balance of compensation and contributions from the Peruvian State as of September 30, 2025, and December 31, 2024.

b) Credit risk -

Credit risk arises from cash and cash equivalents, time deposits with banks, as well as exposure to credit from wholesale and retail customers, which is reflected in trade receivable balances.

i) Risk management -

Credit risk is the risk that a counterparty may be unable to meet its obligations under a financial instrument or sales contract, resulting in financial loss. The Company's financial assets potentially exposed to concentrations of credit risk consist primarily of bank deposits, trade receivables and certain items included in other receivables.

With respect to bank deposits, the Company reduces its exposure to credit risk by distributing its surplus funds across various top-tier financial institutions and limits the amount of credit risk exposure at any one financial institution.

Regarding trade receivables, the concentration of credit risk is among wholesale customers, which are prestigious and leading companies nationwide. The Company has established policies to ensure that sales of goods are made to wholesale customers with a credit history and adequate collateral. These policies include, among other aspects, approval of credit limits for each customer, monitoring procedures, and ongoing follow-up of payment behavior. Regarding contracts signed with state entities, the Armed Forces maintain a 45-day credit agreement with the Company, while the Peruvian National Police maintains a 25-day credit agreement. The Company does not anticipate significant losses arising from the credit risk of its counterparties.

ii) Impairment of financial assets -

The Company has the following types of financial assets that are subject to models to determine the expected credit loss:

Cash and cash equivalents and certain items of other accounts receivable,
Trade receivables for sales of products and services.

For cash and cash equivalents and certain other receivables items, the Company considers any credit losses to be immaterial.

For trade receivables, the Company applies the simplified approach under IFRS 9 to measure expected credit losses, which uses expected loss provisions over the life of the asset.

To measure expected credit losses, trade receivables have been grouped based on homogeneous risk characteristics that represent each customer segment's ability to pay the amounts owed and the days past due. The Company has grouped its customers into (i) Commercial, (ii) Military, (iii) Industrial and (iv) Wholesale.

For the years 2024, and 2023, expected loss rates are based on sales payment profiles over the 12-month period prior to June 30, 2025, and December 31, 2024, respectively, and historical credit losses are adjusted to reflect current and prospective macroeconomic factors affecting customers' ability to settle trade receivables. The expected credit loss is presented in Note 7.

c) Liquidity risk -

Prudent liquidity risk management involves maintaining sufficient cash and cash equivalents, the availability of funding through an adequate number of committed funding sources, and the ability to close out market positions. As of September 30, 2025, and December 31, 2024, the Company's negative working capital and liquidity difficulties are being managed in accordance with management's plans (Note 1-e).

The Company manages its liquidity risk by ensuring that it has sufficient lines of credit at all times and by funding its working capital with cash flows from operating activities and, in exceptional cases, with the financial support of its shareholder, the Peruvian government. The Company is also implementing a Restructuring Plan, whose main objectives are to reverse the adverse liquidity situation and ensure the financial and operational sustainability of the Company.

As of September 30, 2025, the Company maintains short-term revolving credit lines from local and foreign banks for US\$2,536,826 thousand, of which approximately US\$1,792,237 thousand are used in crude oil and refined product purchase operations in the national territory and in foreign markets and other obligations related to working capital. These lines of credit have no maintenance cost requirements and do not require collateral.

The Company's Corporate Finance Department monitors cash flow projections based on liquidity requirements to ensure that there is sufficient cash to meet operational needs while maintaining sufficient headroom for unused credit lines so that the Company does not breach borrowing limits on any credit

line. Cash surpluses and balances above the amount required for working capital management are leveraged through interest-bearing products that are immediately available.

The table below analyzes the Company's financial liabilities grouped on the basis of the period remaining from the date of the statement of financial position to the maturity date. The amounts disclosed in the table are the undiscounted cash flows:

	<u>Value in books</u> <u>US\$000</u>	<u>Flow of cash not discounted</u> <u>US\$000</u>	<u>Less than 1 year</u> <u>US\$000</u>	<u>More than 1 year</u> <u>US\$000</u>	<u>More than 2 years</u> <u>US\$000</u>
2025					
Other financial liabilities	4,376,796	7,076,540	724,861	324,901	6,026,778

3.2 Capital risk -

The Company's objectives in managing its capital are to safeguard its ability to continue as a going concern in order to generate returns to its shareholder, benefits to other stakeholders and maintain an optimal structure to reduce the cost of capital.

The Company monitors its capital on the basis of the leverage ratio, which is calculated by dividing its net debt by its total capital. Net debt corresponds to total other financial liabilities (including current and non-current) and accounts payable to related parties, excluding lease liabilities, less cash, and cash equivalents. Total capital corresponds to equity as shown in the statement of financial position plus net debt.

As of September 30, 2025, for PETROPERÚ's long-term debt in local and foreign currency, the three agencies maintain unchanged outlooks and credit ratings compared to the previous period, which are as follows: i) S&P Global Ratings maintains the rating of B, with a Stable outlook; ii) Moody's Ratings maintains the rating B3 with a Stable outlook, which is equivalent to the rating B- on the S&P Global Ratings and Fitch Ratings scale; and iii) Fitch Ratings maintains the rating CCC+ (no outlook is assigned in this scale range).

As of September 30, 2025 and December 31, 2024, the leverage ratios were as follows:

	<u>2025</u> <u>US\$000</u>	<u>2024</u> <u>US\$000</u>
Other financial liabilities (*)	5,460,119	5,610,658
Accounts payable to related parties	927,969	320,839
Cash and cash equivalents	(33,903)	(130,856)
Net debt (A)	6,354,185	5,800,641
Total equity (B)	2,076,724	2,431,728
Total capital (A)+(B)	8,430,910	8,232,369
Ratio (A/(A+ B))	0.75	0.70

(*) Does not include lease liabilities.

The increase in the leverage ratio corresponds mainly to the debt of US\$ 579 MM with the Ministry of Economy and Finance, due to the execution of the guarantee for the purchase of hydrocarbons, and to the decrease in Equity with the loss of US\$ 355 MM obtained as of September 2025.

3.3 Estimation of fair value -

The information used by the Company to estimate fair value has been categorized into the following levels:

- Level 1: Measurement based on quoted market values in active markets for identical assets or liabilities.

- Level 2: Measurement based on information about the asset or liability other than quoted prices (level 1), but which can be confirmed, either directly (e.g., prices) or indirectly (e.g., derived from prices).
- Level 3: Measurement based on information about the asset or liability that does not come from sources that can be confirmed in the market (i.e., unobservable information, generally based on internal Company estimates and assumptions).

As of September 30, 2025, and December 31, 2024, the Company only measures foreign exchange forward derivative financial instrument contracts at fair value. These derivative financial instruments are initially recognized at their fair values at the date the derivative contract is entered into and are subsequently remeasured at their fair value at the financial statement date. The fair value of foreign exchange forwards is estimated by discounting the contractual net future cash flows and comparing the exchange rate agreed in the contract with a forward exchange rate in effect at the measurement date. The discount is based on the current market interest rate that is available to the Company for similar financial instruments, and whose measurement information has been classified as level 2.

For disclosure purposes, the Company used observable sources (Bloomberg) to determine the fair value of the bonds (measured at amortized cost), classified as Level 1; the fair value of the unsecured loans is estimated by discounting contractual future cash flows at a current market interest rate available to the Company for similar financial instruments, and whose measurement information has been classified as Level 2; and for the CESCE loan and the accounts payable to a related entity, the Company discounted the contractual cash flows at an average interest rate on the Company's medium- and long-term borrowings plus a spread, whose information is classified as Level 3 (Notes 13 and 15).

The carrying value of cash and cash equivalents is already at fair value. The Company believes that the carrying amount of current receivables and payables (including financial obligations and payables to related parties) is similar to their fair values due to their short-term maturity and the impact of the discount is not significant.

4 CRITICAL ACCOUNTING CRITERIA AND ESTIMATES

The estimates and criteria used are continually evaluated and are based on historical experience and other factors, including expectations of future events that are considered reasonable under the circumstances.

4.1 Critical accounting criteria and estimates -

The Company makes estimates and assumptions regarding the future. Accounting estimates, by definition, will very seldom be equal to the respective actual results. The estimates and criteria that have a risk of causing adjustments to reported asset and liability balances are presented below:

a) Useful lives and depreciation of property, plant, and equipment -

Depreciation begins when the asset is available for use, that is, when it is in the location and condition necessary for it to be capable of operating in the manner intended by management, and is calculated using the straight-line method over the estimated useful life of the asset, resulting in depreciation charges proportional to the estimated useful life of the asset measured in number of years. The useful life of assets is evaluated based on: i) the expected physical wear and tear and ii) the expected utilization of the asset. These calculations require making estimates and assumptions about the Company's total production demand and the capital expenditures that will be required in the future.

b) Provisions and contingencies -

The Company is subject to a number of laws and regulations as well as business practices effective in Perú. In this sense, the Company makes judgments and estimates when recording provisions for environmental matters and compliance with technical standards issued by local regulatory entities.

Actual costs may vary from estimates for various reasons, such as variations in cost estimates and different interpretations of the law, opinions, and assessments regarding the amount of losses.

The Company updates the measurement of the provision for environmental remediation of privatized units and for well plugging to reflect new events, changes in circumstances and any other relevant information that becomes available in order to determine which costs will be incurred to cover these items (Note 17). Changes in the variables used to establish the amount of the environmental obligation and for the plugging of wells may cause significant adjustments to the balance of the obligation; in addition, the Company measures the provisions for environmental remediation for oil spills caused by the North Peruvian Oil Pipeline incidents taking into consideration the contracts with the suppliers performing the remediation work pending execution and the estimate of the services in the process of being contracted.

In addition, in the normal course of business, the Company is exposed to certain contingent liabilities related to existing or potential claims, lawsuits and other remedies, including some involving tax matters.

Contingencies are recorded as provisions when it is probable that an outflow of resources will be required to settle an obligation and the amount can be reasonably estimated. The Company bases its estimates on updated projections on the results of the aforementioned actions and resources and the experience of its technical area and its legal advisors, internal and external, in addressing and resolving legal, labor and tax issues. As the scope of the obligations becomes more clearly defined or more information becomes available, the Company may be required to change its estimates of future costs, which could have a significant effect on the results of its operations and financial condition or liquidity.

c) Taxes -

The determination of income tax requires interpretation of Peruvian tax legislation. The Company seeks professional tax advice before making tax-related decisions. The Company believes that these estimates are reasonable and appropriate at this date; however, the Company believes that any interpretation by the tax authorities that may subsequently become known may result in future tax charges. The Company recognizes liabilities for observations in tax audits when additional taxes are payable, the differences impact the current income tax expense in the period in which this fact is determined.

The deferred income tax asset is reviewed at each reporting date to determine its recoverability.

The calculation of the current income tax expense determined by the Company results from the application of current tax regulations and the experience of previous tax audits. In this regard, the Company does not consider it necessary to make a sensitivity disclosure that simulates variations in the calculation, because it believes that, if any difference arises, it would not be material to the results of the financial statements.

d) Tests for possible impairment in the value of property, plant and equipment -

The Company assesses whether an impairment provision is required in accordance with the accounting policy described in Note 2.7. This determination requires the Company's judgment in analyzing evidence of impairment, as well as in determining the recoverable amount. For the latter, judgment is required in preparing expected future cash flows, including forecasts of the Company's future operations, forecasts of economic factors that may affect revenues and costs, as well as in determining the discount rate to be applied to those cash flows.

The estimates used to determine the recoverable amount of assets take into account the Company's historical performance, current operations, future expectations, as well as changes in the Company's operating strategy. These considerations are the most relevant for estimating expected future cash flows.

The recoverable amount of the assets corresponds to the fair value less costs of disposal or their value in use, whichever is higher. The Company determines the recoverable amount based on value in use. For such purposes, it estimates the expected cash flows in the long term, over a 17-year period, which it considers to be appropriate because it observes that after that period the discount rate stabilizes. At

the same time, the determination of value in use presumes the existence of a terminal value of the asset at the end of the aforementioned period.

For purposes of assessing impairment, assets are grouped at the smallest levels at which identifiable cash flows (CGUs) are generated. The Company groups its assets into four CGUs: (i) Production and marketing; (ii) Pipeline Operations, (iii) Leased and privatized units and (iv) Exploitation of Lots.

The Production and Marketing CGU groups the assets of the Conchan, Iquitos and Talara refineries as well as the assets associated with the Company's commercial activity, since its corporate purpose and obligation, as defined by Government Decree Law (Note 1), is to supply fuel to the entire country through its three refineries located throughout the national territory. This obligation requires the Company to operate its three refineries in an interrelated manner, where fuel supply is the priority in order to meet domestic demand. Also, the products marketed to third parties by the Conchan and Iquitos refineries require, to a certain extent, inputs from the Talara refinery, which led the Company to conclude that the cash flows of the Conchan and Iquitos refineries are not largely independent.

4.2 Critical judgments in the application of accounting policies -

Determination of the functional currency -

According to IAS 21, "Changes in Exchange Rates," an entity must define its functional currency, which is the currency of the primary economic environment in which it operates. As part of its assessment, an entity analyzes primary indicators (those associated with the economic forces that mainly influence sales prices and costs); when the primary indicators are not conclusive, it analyzes secondary indicators (those associated with the currency in which it is indebted and in which it maintains its cash surpluses). Following this assessment, the determination of the functional currency may not be obvious, in which case, the entity should use its professional judgment to determine the functional currency that best represents the economic effects of the entity's underlying transactions.

The Company sells its products and services primarily in the Peruvian market; crude oil sales prices are influenced by the international market as well as the domestic market and its regulations. Most of the costs correspond to the import of crude oil, the cost of which is denominated in U.S. dollars and is substantially influenced by international markets, with a predominance of the U.S. market.

As of September 30, 2025, and December 31, 2025, there was no significant change with respect to the circumstances that existed in the past. On the other hand, in relation to the secondary indicators established by IAS 21 "Changes in Exchange Rates", referring to the currency in which the funds from financing activities are generated, the Company maintains the predominance of the US dollar from 2017 to date (Note 13).

The financing structure and the marked predominance of the U.S. dollar led the Company to define this currency as its functional currency.

As of September 30, 2025, and December 31, 2024, according to the Company's critical judgment, the functional currency continues to be the U.S. dollar.

5 SEGMENT INFORMATION

a) Description of the main segments and activities -

The highest decision-making authority (the Board of Directors) reviews the Company's performance in four strategic divisions, which correspond to its operating segments. These divisions offer different products and services and are managed separately as they require different business strategies, both commercial and financial.

The Company's operations are evaluated based on the activity of the following business segments: (i) Production and marketing, (ii) Pipeline Operations, (iii) Leased and privatized units and (iv) Lots Exploitation.

Based on the provisions of IFRS 8, the reportable operating segment for its representativeness over revenues and assets is: 'Production and marketing'; however, on a voluntary basis, the Company reports all of its operating segments as detailed in this same note.

The following summary describes the operations of each reportable segment:

Segment	Operations
Production and marketing	Refining and marketing of products derived from petroleum.
Pipeline Operations	Service of transfer and custody of crudes from the Northern jungle of Perú.
Leased units and Privatized units	Assets that generate cash inflows from rentals.
Exploitation of Lots	Hydrocarbon exploitation in operations with license contracts.

The Company's General Management and Board of Directors review the internal management reports of each segment on a quarterly basis.

There are several levels of transactions between the Production and Marketing and Pipeline Operations segments. These transactions include transfers of oil or other products and transportation services.

b) Other information -

Segment revenues based on the geographic location of customers are as follows as of September 30, 2025, and September 30, 2024:

	<u>2025</u> <u>US\$000</u>	<u>2024</u> <u>US\$000</u>
Peru	2,272,259	2,277,201
Other countries	320,881	367,153
	<u>2,593,140</u>	<u>2,644,354</u>

Information on revenues broken down by type of product is described in Note 20.

6 CASH AND CASH EQUIVALENTS

As of September 30, 2025, and December 31, 2024, this caption comprises:

	<u>2025</u> <u>US\$000</u>	<u>2024</u> <u>US\$000</u>
Current accounts	33,888	130,846
Fixed funds	15	10
	<u>33,903</u>	<u>130,856</u>

The Company maintains cash deposited in financial institutions in the form of checking accounts in local and foreign currency. As of September 30, 2025, the funds in these accounts are freely available and earn interest rates of 3.8% in soles and 2.7% in US dollars (4.50% in soles and 3.03% in US dollars, as of December 31, 2024).

7 TRADE RECEIVABLES

As of September 30, 2025, and December 31, 2024, this caption comprises:

	<u>2025</u> <u>US\$000</u>	<u>2024</u> <u>US\$000</u>
Wholesale distributors	72,310	90,881
Oil companies	29,656	31,354
Fuel marketers	19,340	18,518
Aviation business	11,533	604
Foreign market	9,197	9,254
Construction sector	4,759	11,079
Armed Forces and National Police of Perú	6,864	8,487
Industrial sector	4,852	2,189
Electricity sector	570	1,275
Mining sector	360	331
Transportation sector	140	1,084
Fishing sector	-	4,495
Various customers	722	741
Doubtful accounts	14,336	13,335
	<u>174,639</u>	<u>193,627</u>
Price Stabilization Fund - MEM (Note 1-c)	29,601	39,368
	<u>204,240</u>	<u>232,995</u>
Less: Expected loss from trade receivables	(14,336)	(13,335)
	<u>189,904</u>	<u>219,660</u>

Trade receivables -

Trade receivables balances correspond to invoices denominated in soles and U.S. dollars, mainly from the sale of refined products. Accounts receivable from the Peruvian Armed Forces and the Peruvian National Police have a maturity of 45 and 25 days, respectively. Accounts receivable from wholesale distributors and other customers have maturities between 7 and 45 days. Accounts receivable, in

accordance with the Company's internal policies, are mostly secured by letters of guarantee or other instruments from the national financial system, in accordance with the credit policy approved by the Board of Directors.

Price Stabilization Fund - MEM -

The total amount receivable from the Directorate General of Hydrocarbons (DGH), as of September 30, 2025, and December 31, 2024, amounts to US\$29,601 thousands and US\$39,368 thousand, respectively, and is generated by compensation and contribution operations (Note 2.18-b).

The annual movement of the total balance of the Price Stabilization Fund item is explained as follows:

	<u>2025</u>	<u>2024</u>
	US\$000	US\$000
Opening balance receivable	39,368	47,920
Price compensation	2,766	14,131
Price contribution	(15,244)	(17,678)
Net charged to income from ordinary activities (Note 20)	(12,478)	(3,547)
Collection of compensation and contribution payments	-	(4,555)
Exchange difference	2,711	(450)
Final balance receivable	<u>29,601</u>	<u>39,368</u>

Expected loss from trade receivables -

To measure expected credit losses, the Company has classified its customers according to homogeneous risk characteristics that represent the payment capacity of each customer segment for the amounts owed. This classification has been made on the basis of customer categories representing specific risks: wholesale sector, industrial sector, commercial sector, Armed Forces, among others.

Expected loss rates are based on sales payment profiles over the 12-month period prior to September 30, 2025, and December 31, 2024, and historical credit losses are adjusted to reflect current and prospective macroeconomic factors affecting customers' ability to settle trade receivables. The Company has identified the growth rate of hydrocarbon GDP and the variation in real minimum wage as the most relevant factors and, accordingly, adjusts historical loss rates based on expected changes in these factors.

The annual movement of the provision for expected loss on trade receivables was as follows:

	<u>2025</u>	<u>2024</u>
	US\$000	US\$000
Opening balance	13,335	13,532
Expected loss (Note 23)	-	-
Exchange difference	1,001	(197)
Final balance	<u>14,336</u>	<u>13,335</u>

In the Company's opinion, the estimated expected loss recognized in the financial statements and the collateral requested are sufficient to cover any potential risk in the recovery of trade receivables as of the date of the statement of financial position.

Overdue trade receivables, for which no loss is expected, are related to independent customers with whom letters of guarantee are held and/or whose debt has been reconciled and is expected to be collected in the short term, so the Company has not estimated an expected loss for these accounts.

The expected loss on trade receivables is included in selling and distribution expenses in the statement of comprehensive income (Note 23).

8 OTHER ACCOUNTS RECEIVABLE AND ADVANCES

As of September 30, 2025, and December 31, 2024, this caption comprises:

	<u>2025</u> US\$000	<u>2024</u> US\$000
Current		
Tax credit - Value Added Tax (a)	216,560	193,494
Tax credit - Income Tax (b)	37,273	41,808
Restricted funds	52,952	61,850
Advances granted to suppliers	131,468	19,510
Personnel loans	2,806	3,150
Loans to third parties	1,848	1,962
Various	4,214	3,754
Doubtful accounts	34,905	33,649
	<u>481,665</u>	<u>359,177</u>
Loss on uncollectible of other accounts receivable (f)	(34,903)	(33,649)
Current portion	<u>446,762</u>	<u>325,528</u>
Non-current		
Tax credit - Value Added Tax, long-term (c)	1,196,448	1,060,386
Claims to the Superintendency of Tax Administration (d)	13,676	7,796
Other taxes, long-term	1,500	7,286
Non-current portion	<u>1,211,624</u>	<u>1,075,468</u>

(a) Tax credit - Value Added Tax, short-term -

As of September 30, 2025, it corresponds to the Value Added Tax on operations for US\$ 82,101 thousand (equivalent to S/. 285,384 thousand), PMRT Value Added Tax for US\$ 134,446 (equivalent to S/ 467,328 thousand).

As of December 31, 2024, it corresponds to the Value Added Tax on operations for US\$61,601 thousand (equivalent to S/232,235 thousand), PMRT Value Added Tax for US\$117,975 thousand (equivalent to S/444,766 thousand) and tax credit for excise tax for US\$13,918 thousand (equivalent to S/52,472 thousand).

From January to September 2025, SUNAT made VAT tax credit refunds of US\$44,151 thousand (equivalent to S/160,746 thousand), and from January to December 2024, SUNAT made VAT tax credit refunds of US\$73,252 thousand (equivalent to S/275,762 thousand), which were requested by the Company for the refund of the tax credit balance in favor of the exporter.

(b) Tax credit - Income tax, short term -

As of September 30, 2025, it corresponds to accumulated income tax payments on account of US\$37,273 thousand (equivalent to S/129,562 thousand), which are expected to be recovered in the short term through income tax payable generated by future operations.

As of December 31, 2024, it corresponds to accumulated income tax payments on account of US\$41,808 thousand (equivalent to S/157,616 thousand), which are expected to be recovered in the short term through income tax payable generated by future operations.

(c) Tax credit - Value Added Tax, long-term -

As of September 30, 2025, it corresponds to the balance in favor of the VAT paid for the acquisition of goods and services related mainly to the NRT amounting to US\$402,406 thousand (equivalent to S/1,398,748 thousand) and the VAT for operations amounting to US\$794,056 thousand (equivalent to S/2,760,157 thousand).

As of December 31, 2024, it corresponds to the balance in favor of the VAT paid for the acquisition of goods and services related mainly to the NRT amounting to US\$367,589 thousand (equivalent to S/1,385,812 thousand) and the VAT for operations amounting to US\$692,797 thousand (equivalent to S/2,611,843 thousand).

This tax credit balance has no expiration date. The Company expects to recover this tax credit through its operations in the long term.

(d) Complaints to the National Superintendence of Customs and Tax Administration (SUNAT) -

As of September 30, 2025, and December 31, 2024, this item only includes File No. 17806-2012, which corresponds mainly to claims related to limitations on the Turbo A-1 product (fuel intended exclusively for aeronautical activities) arising from Supreme Decree No. 186-2-002-EF, which established the non-taxability of the ISC to sales of Turbo A-1 intended for aeronautical activities in general. In this regard, the Company considers it illegal to restrict them to those sales made by for-profit entities, since they were ultimately destined to aviation companies under private contracts.

According to the opinion of the Company's legal advisors, the sales of Turbo A - 1 were made in accordance with the law, so on February 4, 2022, Management filed a Contentious-Administrative Lawsuit against Resolution No. 09743-4-2021, a claim that is being processed before the 22nd Tax Sub-Specialty Administrative Litigation Court (File No. 0744-2022-0-1801-JR-CA-22).

In November 2012, the Company paid the amount of US\$8,651 thousand (equivalent to S/29,197 thousand), in response to several Determination and Fine Resolutions issued for alleged omissions in the payment of ISC and VAT corresponding to Turbo A - 1 sales in 2007. These Resolutions were challenged by PETROPERU (File No. 17806-2012), with the Fourth Chamber of the Tax Court, as the last administrative instance, issuing Resolution No. 09743-4-2021 dated November 5, 2021, by which it confirms the Administrative Resolution No. 0150140010514, regarding the objection to sales of Turbo A-1 fuels not intended for aviation companies.

As of September 30, 2025, this lawsuit, which is being processed before the 22nd Tax Sub-Specialty Administrative Litigation Court (File No.0744-2022-0-1801-JR-CA-22), is pending resolution. The Company and its external legal counsel expect that the likelihood of recovering the claim is high, based on the resolution of other similar claims that resulted in a favorable outcome for the plaintiffs.

(f) Loss on uncollectible of other accounts receivable -

This loss is mainly related to ongoing claims made to municipalities for property taxes and excise taxes, for which the probability of recovery is low.

With respect to other accounts receivable, the Company considers that the credit risk of the counterparties is low, and therefore has not recorded an expected loss on these accounts as they are considered not significant.

The annual movement in the loss for uncollectible accounts is as follows:

	2025	2024
	US\$000	US\$000
Opening balance	33,649	33,874

Exchange difference	1,029	(225)
Final balance	<u>34,903</u>	<u>33,649</u>

9 INVENTORIES

As of September 30, 2025, and December 31, 2024, this caption comprises:

	<u>2025</u> <u>US\$000</u>	<u>2024</u> <u>US\$000</u>
Crude oil	244,548	220,572
Refined products:		
- In process	190,379	158,842
- Finished	212,390	208,406
- Acquired refined products	50,731	69,739
Inventories in transit	26,999	96,710
Supplies	104,092	89,112
Reclassification to property, plant, and equipment (*)	<u>(123,716)</u>	<u>(116,174)</u>
	705,423	727,207
Less - Provision for impairment of supplies	<u>(4,023)</u>	<u>(4,024)</u>
	<u>701,400</u>	<u>723,183</u>

As of September 30, 2025, the price of crude oil had a downward trend, closing at US\$ 67.02 per barrel (US\$68.17 per barrel as of September 30, 2024). The average price during the month of September 2025 was US\$67.52 per barrel (US\$69.49 per barrel as of September 30, 2024).

(*) Corresponds to the reclassification of the minimum amount of crude oil required by ONP to operate in the amount of US\$100,718 thousand and spare parts that are part of fixed assets and have been considered as part of the inventory in the amount of US\$22,998 thousand.

The annual movement in the provision for impairment of supplies is explained as follows:

	<u>2025</u> <u>US\$000</u>	<u>2024</u> <u>US\$000</u>
Opening balance	4,024	4,042
Impairment of supplies	-	198
Recovery	<u>(1)</u>	<u>(216)</u>
Final balance	<u>4,023</u>	<u>4,024</u>

This provision has been recognized as a result of analyzing the net realizable value of inventories, considering the expected net cash flow to be obtained from their consumption, as well as their physical condition. As of September 30, 2025, and December 31, 2024, the Company believes that the provisioned amount reflects the risk of impairment of all its inventories due to both physical obsolescence and net realizable value.

10 PROPERTY, PLANT AND EQUIPMENT

The movement in this caption as of September 30, 2025, and December 31, 2024, is as follows:

(*) On November 15, 2023, the License Agreement for Lot Z-69 was signed for a term of 2 years or until the effective date of a new contract. As a consequence of this contract, the land that was leased to SAVIA until November 14, 2023, and that was presented under Investment properties was transferred as of November 15, 2023 to Property, plant and equipment Z-69.

(i) Main projects -

a) New Talara Refinery, formerly the Talara Refinery Modernization Project - PMRT -

Its objective is the technological development involving the construction of new industrial facilities, modernization, and expansion of existing ones to achieve the following:

- i) The production of diesel and gasoline with less than 50 parts per million (ppm) of sulphur.
- ii) Increasing the refinery's production capacity from 65 to 95 thousand barrels per day (bpd).
- iii) The processing of heavier and cheaper crudes for the production of lighter fuels of higher commercial value.

The project status as of September 30, 2025, is detailed below, specifying the physical progress of the assets and the economic progress for costs incurred:

- **Comprehensive Advance -**

- PMRT Comprehensive Physical Progress: 99.97% Actual versus 100% Scheduled

By Board Agreement No. 080-2024-PP of July 22, 2024, the Board of Directors of PETROPERÚ S.A. approved the Redistribution of the Amount of items that make up the investment amount of the PMRT, without altering the amount approved by Board Agreement No. 095-2023-PP of August 11, 2023.

With Technical Report No. GCOP-1461-2025 of May 27, 2025, the Corporate Operations Management approves the Redistribution of Items that make up the Investment Amount of the PMRT, without altering the amount approved by A.D. 095-2023-PP of August 11, 2025.

The composition of the budgeted cost (economic progress) of the project, compared to the disbursements incurred as of September 30, 2025, is detailed below:

	<u>September 30, 2025</u>		<u>Total budget</u>	
	<u>Disbursements</u> US\$000	<u>Percentage of</u> <u>progress</u> %	<u>Planned</u> US\$000	<u>Total</u> <u>Percentage</u> %
Técnicas Reunidas (TR) -				
Processing units	3,440,072	99.28	3,464,899	53.06
Consorcio Cobra SCL -				
Auxiliary units	931,495	97.77	952,745	14.59

Supervision	401,788	98.07	409,702	6.27
Management	270,467	93.85	288,205	4.41
Interest on financing	988,730	99.69	991,793	15.19
	<u>6,441,979</u>	<u>98.65</u>	<u>6,530,315</u>	<u>100</u>

- **Process Units EPC Progress - Contract with Técnicas Reunidas (TR) -**

As of September 30, 2025, the overall physical progress on the EPC Contract with TR is 100% versus 100% on Schedule (actual progress of 100% versus 100% on Schedule, as of December 31, 2024).

As of September 30, 2025, the cumulative amount executed is US\$3,399.02 million.

- **Auxiliary Units and Complementary Works EPC Progress- Contract with Consorcio Cobra SCL UA&TC -**

As of September 30, 2025, the overall physical progress in the execution of the EPC Contract with Consorcio Cobra SCL UA&TC is 100% versus 100% as scheduled (an actual progress of 100% versus a scheduled progress of 100% as of December 31, 2024).

As of September 30, 2025, the cumulative amount executed is US\$1,088.67 million.

- **NRT's financial structure -**

As of September 30, 2025, NRT's funding comes from the following sources:

- Capital contribution: US\$325 million.
- Equity: US\$1,750 million.
- Bond issues (15 and 30 years): US\$2,000 million.
- Financing guaranteed by Compañía de Seguros de Crédito a la Exportación (CESCE): US\$1,300 million.
- Bond reopening (30 years): US\$1,155.3 million (includes issue premium of US\$155.3 million).

b) **Installation and Operation Project for the New Ilo Terminal -**

This project consists of the construction, installation, and start-up of a new supply terminal in Ilo, with a storage capacity of 227 MB for the reception, storage and dispatch of fuels (diesel, gas. Premium and Gas. Regular), in order to meet the demand in the southern part of the country. As of December 2024, the accumulated investment amounted to US\$33,790 thousand, which corresponds to 74.20% of the investment budget; however, the Company's management decided to discontinue the investment and recognized an impairment loss of US\$21,534 thousand. Also, as of September 30, 2025, Management is evaluating the final disposition of unimpaired assets of US\$12,256 thousand.

c) **Supply Plant Project in Ninacaca -**

This project corresponds to the construction, installation and start-up of a new fuel supply plant located in the district of Ninacaca, province of Pasco, to meet the demand for liquid fuels in the central area of the country. As of December 31, 2024, the investment in this project amounts to US\$6,144 thousand, which corresponds to 99.95% of the investment budget; however, the Company's management decided to discontinue the project and recognized an impairment loss of US\$3,135 thousand. Also, as of September 30, 2025, Management is evaluating the final disposition of unimpaired assets of US\$3,009 thousand.

d) **Sales Plant Puerto Maldonado (1st stage) -**

This project corresponds to the construction, installation, and start-up of a new fuel supply plant in Puerto Maldonado, storage capacity: 50 MB (DB5-S50: 38 MB and G Regular: 12 MB), to meet the demand for liquid fuels in the area of influence. As of September 30, 2025, the investment amounted to US\$17,294 thousand, of which 100% has been executed. Overall physical progress was 59.7% vs. 73.4% scheduled. As of the date of these financial statements, the Company is evaluating an additional investment of US\$23,800 thousand, which is in the process of being approved by the Board of Directors.

(i) **Insurance -**

The Company's assets and operations are insured by a comprehensive insurance policy covering the following:

- a) Property and loss of profits policy for an insured amount of US\$600,000 thousand with a stated value of US\$9,636,736 thousand; in force until December 22, 2025.
- b) Sabotage and terrorism policy for an insured amount of US\$ 200,000 thousand with declared value of assets of US\$ 7,764,374 thousand; Effective until August 26, 2026.
- c) Comprehensive general liability policy for an insured amount of US\$100,000 thousand; in force until May 25, 2026.
- d) Aviation liability policy for an insured amount of US\$500,000 thousand, in force until February 24, 2027.

As of September 30, 2025, and December 31, 2024, Management believes that the comprehensive insurance policy described above adequately covers the estimated risk of loss of its assets.

(ii) Depreciation -

As of September 30, 2025 and December 31, 2024, the depreciation charge for the year for property, plant and equipment is distributed as follows:

	<u>2025</u> <u>US\$000</u>	<u>2024</u> <u>US\$000</u>
Cost of sales (Note 22)	117,333	209,105
Selling and distribution expenses (Note 23)	2,815	10,790
Administrative expenses (Note 24)	4,006	6,983
	<u>124,154</u>	<u>226,878</u>

(iii) As of September 30, 2025, and December 31, 2024, the Company has not pledged any of its property, plant, and equipment as collateral for loans.

(iv) The gross cost of fully depreciated assets in use as of September 30, 2025 amounts to US\$211,620 thousand, equivalent to S/711,222 thousand (US\$ 202,678 thousand, equivalent to S/. 680,122 thousand in 2024).

(v) Major additions related to works in progress -

As of September 30, 2025, the additions of works in progress by the PMRT correspond to EPC, PMC, Ancillary Services and Other Services amounting to US\$ 8,540 thousand equivalent to S/ 29,988 thousand (US\$ 122,018 thousand equivalent to S/ 460,313 thousand in 2024); and other works in progress at the corporate level amounting to US\$ 52,520 thousand equivalent to S/ 190,060 thousand (US\$ 88,720 thousand equivalent to S/ 333,505 thousand in 2024).

11 INTANGIBLE ASSETS

As of September 30, 2025 and December 31, 2024, this caption comprises:

	<u>Software and licenses US\$000</u>	<u>Intangibles in progress (a) US\$000</u>	<u>Total US\$000</u>
Balance as of December 31, 2024			
Cost	95,046	63,800	158,847
Accumulated depreciation	(33,924)	-	(33,924)
Net cost	<u>61,123</u>	<u>63,800</u>	<u>124,923</u>

Year 2025			
Opening balance of net book cost	61,123	63,800	124,923
Additions	-	12,504	12,504
Transfers	741	(741)	-
Amortization for the year	(5,540)	-	(5,540)
As of September 30, 2025	<u>56,324</u>	<u>75,563</u>	<u>131,887</u>
Cost	95,787	75,563	171,350
Accumulated depreciation	(39,463)	-	(39,463)
As of September 30, 2025	<u>56,324</u>	<u>75,563</u>	<u>131,887</u>

- (a) As of September 30, 2025, the amount of US\$ 131,887 thousand (S/ 468,007 thousands) corresponds to the net value of intangibles, Software, licenses and mainly the ERP SAP business software and the Back-Up FCK software (for PMRT processes), in addition to Lot 64 and Lot 192 projects. As of December 31, 2024 the net amount of intangibles was \$ 124,923 thousand (S/ 442,606 thousand).

12 RIGHT-OF-USE ASSETS AND LEASE LIABILITIES

- a) This item comprises the following amounts recognized in the statement of financial position:
As of September 30, 2025 and December 31, 2024, this caption comprises:

	<u>2025</u> <u>US\$000</u>	<u>2024</u> <u>US\$000</u>
Right-of-use assets	<u>39,547</u>	<u>58,884</u>
Lease liabilities:		
Current portion	38,173	41,623
Non-current portion	<u>4,566</u>	<u>19,533</u>
	<u>42,739</u>	<u>61,156</u>

Lease liabilities include the net present value of right-of-use asset payments associated with leases of housing, vessels, barges, and information technology assets.

As of September 30, 2025, and December 31, 2024, the Company has no leases containing variable consideration or leases with residual value guarantees. Leases of less than 12 months and of low value have been recognized as expenses in accordance with the policy indicated in Note 2.12.

- b) The movements in right-of-use assets and lease liabilities as of September 30, 2025 and December 31, 2024 are as follows:

	<u>2025</u> <u>US\$000</u>	<u>2024</u> <u>US\$000</u>
Right-of-use assets		
Cost:		
Opening balance	175,397	115,536
Additions for new leases	<u>10,438</u>	<u>59,861</u>
Final balance	<u>185,835</u>	<u>175,397</u>
Depreciation:		
Opening balance	(116,514)	(79,746)

Operating cost	(8,970)	(9,272)
Depreciation for the year	(20,984)	(25,293)
Adjustments for incremental rate restatement and others	180	(2,202)
Net cost	<u>39,547</u>	<u>58,884</u>
Lease liabilities:		
Opening balance	61,156	36,459
Additions for new leases	10,438	59,861
Lease payments	(29,021)	(32,967)
Adjustments for incremental rate restatement and others	-	(2,163)
Difference in exchange	166	(34)
Accrued interest	4,245	5,333
Interest paid	(4,245)	(5,333)
Final balance	<u>42,739</u>	<u>61,156</u>

- c) As of September 30, 2025, right-of-use asset additions correspond mainly to the renewal of barge leases expiring in 2027 and a UPS and AAP lease expiring in 2028. As of December 31, 2024, right-of-use asset additions correspond mainly to the renewal of barge leases whose term expires in 2026.
- d) The charge to income for the year's depreciation of right-of-use assets is distributed among the following cost centers:

	<u>2025</u> <u>US\$000</u>	<u>2024</u> <u>US\$000</u>
Cost of sales (Note 22)	20,071	23,717
Selling and distribution expenses (Note 23)	116	162
Administrative expenses (Note 24)	797	1,414
	<u>20,984</u>	<u>25,293</u>

13 OTHER FINANCIAL LIABILITIES

As of September 30, 2025, and December 31, 2024, this caption comprises:

	<u>2025</u> <u>US\$000</u>	<u>2024</u> <u>US\$000</u>
Current liabilities		
Unsecured bank loans (i)	434,971	1,641,185
CESCE loan (iii)	144,444	144,444
Accrued interest	57,672	14,634
	<u>637,087</u>	<u>1,800,263</u>
Non-current liabilities		
Corporate bonds (ii)	3,108,213	3,111,848
CESCE loan (iii)	631,497	698,547
Bank loans	1,083,322	-
	<u>4,823,032</u>	<u>3,810,395</u>
Total financial debt	<u>5,460,119</u>	<u>5,610,658</u>

- (i) Unsecured bank loans -

Correspond to contracts entered into by the Company with local and foreign financial institutions, which were used as working capital. These loans are current maturities, are denominated in soles and US dollars, and do not have specific guarantees (see section “a” in this note).

(ii) Corporate bonds -

On June 12, 2017, the Company issued bonds in the international market for US\$2,000,000 thousand under Rule 144 and Regulation S, which are exceptions (“Safe-harbors”) to the American regulatory framework (US Securities Act - 1933 and US Securities Exchange Act -1934) that allow foreign issuers to offer, place and/or resell securities, without the need to register them with the Securities and Exchange Commissions on the New York Stock Exchange (SEC). The funds received have been earmarked for the construction of NRT.

Below is a detail of the bonds issued:

- 2032 Notes, principal amount of US\$1,000,000 thousand with semi-annual coupon payments at a fixed annual rate of 4.750%, for a term of 15 years. Coupons are payable from December 2017 and the principal payment will take place on the maturity date of the bonds. Transaction costs amounted to US\$4,193 thousand and as of September 30, 2025, the balance amounted to US\$4,064 thousand (US\$4,441 thousand as of December 31, 2024).
- 2047 Notes, principal amount of US\$2,000,000 thousand (US\$1,000,000 thousand received in the first issuance in June 2017 and an additional US\$1,000,000 thousand resulting from the bond reopening in February 2021), at a fixed rate of 5.625% per annum, for a term of 30 years. Coupons are payable semi-annually from December 2017 and the principal payment will take place on the maturity date of the bonds. Transaction costs amounted to US\$9,558 thousand and as of September 30, 2025, the balance amounted to US\$8,360 thousand (US\$8,504 thousand as of December 31, 2024) and the excess amount of the placement over par of the bonds at reopening amounted to US\$135,889 thousand and as of September 30, 2025 the balance amounted to US\$120,636 thousand (US\$124,793 thousand as of December 31, 2024).

The bond contract issued does not include the obligation to comply with financial covenants; however, it does require the provision of financial information to bondholders.

The bonds issued do not have specific contractual guarantees; however, Law No. 30130 approves the granting of National Government guarantees for up to US\$1,000 million (Note 1-a).

(iii) CESCE Loan -

On January 31, 2018, a syndicated loan contract was signed, with Deutsche Bank SAE as administrative agent, for US\$1,300,000 thousand. The total disbursements related to the loan were received between 2018 and 2021, which were destined to reimburse the different financing sources used for the payment of PMRT invoices, corresponding to the EPC with Técnicas Reunidas.

Transaction costs amounted to US\$72,478 thousand and as of September 30, 2025 the balance amounted to US\$18,502 thousand (US\$23,675 thousand as of December 31, 2024). Interest and principal are amortized semiannually, beginning in May 2019 and June 2022, respectively. This loan matures in 2030, based on a fixed interest rate of 3.285%.

The loan in question is 99% guaranteed by Compañía Española de Seguros de Crédito a la Exportación (CESCE), for which the Company pays a commission as consideration. This loan has no specific contractual guarantees from the Company or the Peruvian government.

As part of the contract, the Company is obligated to comply with certain covenants, such covenants are as follows:

Financial covenants:

- Debt ratio.
- Debt service coverage.
- Direct financing for investment in the PMRT.

As of September 2024, the financial indebtedness ratio was set at 4.00. As of December 31, 2024, this ratio was 2.35 and as of September 2025, it was 3.02.

Non-financial covenants:

- Preserving and maintaining business operations.
- Submit the Company's audited financial statements within 150 days after the close of each fiscal year.
- Use the loan to pay for the acquisition of goods and services, including EPC contract payments.
- Grant the loan pari passu status (equal terms) in priority of payment with all its creditors.
- Comply with the procedures established for the purpose of preventing the Company from being used in money laundering activities, financing of terrorist activities, fraud or other corrupt or illegal purposes or practices.

In Management's opinion, as of September 30, 2025, the Company has complied with the established covenants. On May 30, 2025, the Company obtained the amendment that provided for extending the submission of the audited financial statements to the respective financial creditors until July 15, 2025, complied with the receipt of the 2024 audit opinion, approval by the Board of Directors and its publication.

a) Debt Repayment Terms and Schedule -

The terms and conditions of the outstanding loans are as follows:

	Currency Original	Maturity	As of September 30,		As of December 31,	
			2025		2024	
			Value nominal US\$000	Amount in in books US\$000	Value nominal US\$000	Amount in in books US\$000
Unsecured bank loans	S/	2025	-	-	1,107,685	1,107,685
Unsecured bank loans	US\$	2025	-	-	533,500	533,500
Unsecured bank loans	S/	2026	1,130,986	1,130,986	-	-
Unsecured bank loans	US\$	2026	387,308	387,308	-	-
CESCE Loans	US\$	2030	794,444	782,611	866,667	842,991
Corporate bonds	US\$	2032	1,000,000	995,937	1,000,000	995,559
Corporate bonds	US\$	2047	2,000,000	2,112,276	2,000,000	2,116,289
Accrued interest			-	51,001	-	14,634
			<u>5,312,739</u>	<u>5,460,119</u>	<u>5,507,852</u>	<u>5,610,658</u>

The carrying amount corresponds to the amortized cost of other financial liabilities discounted at the effective rate.

b) Classification of loans by type of use (*) -

The Company used or will use the funds obtained from financing as follows:

	2025 US\$000	2024 US\$000
Working capital	1,518,294	1,641,185
NRT	3,884,154	3,954,839
	<u>5,402,448</u>	<u>5,596,024</u>

(*) Does not include accrued interest payable.

As of September 30, 2025, and December 31, 2024, the Company held specific loans earmarked for NRT and its effective interest rates were the interest capitalization rates used.

c) Movement of financial obligations -

The movement of debt due to financial obligations has been as follows:

	Loans bank unsecured US\$000	Bonds corporate US\$000	Loan CESCE US\$000	Total US\$000
Balance as of January 1, 2024	1,046,070	3,122,700	979,348	5,148,118

14 TRADE PAYABLES

As of September 30, 2025, and December 31, 2024, this caption comprises:

	2025 US\$000	2024 US\$000
Overseas suppliers of crude oil and refined products	751,753	899,442
Domestic suppliers of crude oil and refined products	135,460	78,236
Suppliers of goods and services	311,623	265,171
Shipping companies and terminal operators and sales plants	38,967	39,193
	<u>1,237,803</u>	<u>1,282,042</u>

As of September 30, 2025, the main national suppliers of crude oil and products are: Upland Oil and Gas Llc Sucursal del Perú, whose balance amounts to US\$ 51,569 thousand equivalent to S/186,013 thousand (US\$ 0 thousand equivalent to S/ 0 as of December 31, 2024), Graña y Montero Petrolera S.A., whose balance amounts to US\$ 38,514 thousand equivalent to S/ 136,178 thousand (US\$ 19,375 thousand equivalent to S/ 72,676 as of December 31, 2024) and Petrotal Perú S.R.L., whose balance amounts to US\$ 20,386 thousand equivalent to S/ 76,475 thousand (US\$ 32,250 thousand equivalent to S/ 120,931 as of December 31, 2024). The main overseas suppliers of crude oil and products are: Trafigura Pte Ltd, which is owed US\$ 310,956 thousand equivalent to S/1,130,919 thousand (US\$ 145,498 thousand equivalent to S/. 546,701 thousand as of December 31, 2024), Shell Western Supply and Trading, which is owed US\$ 140,835 thousand equivalent to S/526,266 thousand (US\$ 236,177 thousand equivalent to S/ 886,790 thousand as of December 31, 2024) and Exxon Mobil Sales and Supply Llc, which is owed US\$ 109,300 thousand equivalent to S/ 396,506 thousand (US\$ 86,887 thousand equivalent to S/ 327,534 thousand as of December 31, 2024).

As of September 30, 2025, the main service providers are: OIG Perú S.A.C., whose balance amounts to US\$ 98,157 thousand equivalent to S/ 357,361 thousand (US\$ 44,086 thousand equivalent to S/ 165,769 thousand as of December 31, 2024), Consorcio Cobra SCL UA&TC, whose balance amounts

to US\$ 41,012 thousand equivalent to S/ 153,878 thousand (US\$ 39,781 thousand equivalent to S/ 148,714 thousand as of December 31, 2024), Técnicas Reunidas de Talara S.A.C., whose balance amounts to US\$ 32,183 thousand equivalent to S/ 116,988 thousand (US\$ 26,259 thousand equivalent to S/ 97,426 thousand as of December 31, 2024) and IMI del Perú S.A.C., whose balance amounts to US\$ 13,963 thousand equivalent to S/49,497 thousand (US\$ 18,113 thousand equivalent to S/ 67,896 thousand as of December 31, 2024).

This account reflects the Company's obligations related to the acquisition of crude oil and refined products with plant operation transportation services and the acquisition of supplies and spare parts. Invoices are issued in U.S. dollars, are current due, do not bear interest and the Company has not provided specific guarantees.

(a) Emergency Decree No. 010-2022, issued on May 12, 2022, established extraordinary economic and financial measures aimed at securing the local fuel market. Therefore, temporary financial support was provided by the Ministry of Economy and Finance (MEF) through the General Directorate of the Public Treasury by means of a loan to the Company for an amount of S/2,785,000 thousand (equivalent to US\$750,000 thousand), to meet short-term obligations during 2022. By Emergency

Decree No.013-2024, issued on September 13, 2024, its capitalization was approved, plus interest accrued as of the effective date of said decree (September 14, 2024) (Note 19).

- (b) Issuance of Cancellation Documents - Public Treasury in favor of the Company, in application of Emergency Decree No.010-2022, the Company requested the General Directorate of the Public Treasury (DGTP) of the MEF, the issuance of Cancellation Documents in favor of the Company, up to the amount of S/500,000 thousand, to be used for the payment of customs duties and taxes associated with the purchases of crude oil and fuel products, as well as other taxes for fuel commercialization operations. These cancellation documents were issued on a monthly basis during the year 2022, at the Company's request. As of December 31, 2022, the Company received Cancellation Documents for S/595,865 thousand (equivalent to US\$157,295 thousand) and amortized S/95,868 thousand (equivalent to US\$24,721 thousand), accruing interest at rates between 5% and 6.75%. Under Emergency Decree No. 013-2024, the payment deadline is extended to July 31, 2025, and under Law 32185, the Public Sector Budget Law for Fiscal Year 2025, the reimbursement deadline is extended to December 31, 2028.
- (c) By Emergency Decree No. 004-2024, issued on February 27, 2024, the Short-Term Debt Operation is approved, under the modality of granting a Guarantee from the National Government for an amount in soles equivalent to US\$800,000 thousand derived from a loan to be granted by Banco de la Nación for working capital necessary to guarantee the continuity of fuel supply and the development of economic activities at a national level. In September 2024, S/2,969,224 thousand (equivalent to US\$798,648 thousand) were disbursed. Likewise, by means of the aforementioned Emergency Decree No. 013-2024 the assumption of the debt by the MEF was approved, for an amount that includes interest accrued as of the effective date of said decree.
- (d) Likewise, by Emergency Decree No. 013-2024, the assumption was approved by the Ministry of Economy and Finance, through the General Directorate of the Public Treasury, of the payment of the maturities occurring in the second half of 2024, of the debts held by the Company, corresponding to external debt operations without the guarantee of the National Government, under the form of bond issuance, carried out within the framework of the authorizations provided for in Ministerial Resolutions No. 170-2017-EF/52 and No. 023-2021-EF/52, and under the form of a loan guaranteed by CESCE, contracted within the framework of the authorization provided for in Ministerial Resolution No. 017-2018-EF/52, which are allocated to partially finance the NRT construction. Within this framework, on November 22, 2024, the PETROPERU debt assumption agreement was signed with the General Directorate of the Public Treasury to repay this debt between 2029 and 2032.
- (e) Execution of letters of credit guaranteed by the State, as of September 2025 for US\$575,524 thousand.
- (f) Owners -

The Peruvian State owns the Company's share capital and is represented by each member of the General Shareholders' Meeting. According to the twenty-third article of the Company's bylaws, the General Shareholders' Meeting is composed of five members representing the class "A" and "B" shares owned by the Peruvian State: the MEM, who will preside and four members representing the Peruvian State appointed by Supreme Decree (MEF, Vice Ministry of Hydrocarbons of the MEM, Vice Ministry of Economy of the MEF and Vice Ministry of Finance of the MEF). Transactions between the Company, the Peruvian State and MEM correspond to transactions with shareholders.

16 OTHER LIABILITIES AND OTHER PAYABLES

	<u>200,666</u>	<u>142,157</u>

- (a) Corresponds to the lease contract signed with Savia, which expired on November 15, 2023. In this regard, in November 2013, the Company signed a lease contract for Lot Z-2B with Savia Perú S.A. for a 10-year term, which expired on November 15, 2013. The contract remained in effect under Article 1700 of the Peruvian Civil Code, which stipulates that, at the end of the contract term, if the lessee continues to use the leased property, there is no tacit renewal, but rather the lease continues, under the same stipulations, until the lessor requests its return, which may occur at any time. For this lease, Savia has been paying the Company US\$10,000 thousand per year until 2018.

In April 2018, Norex Energía S.A (formerly Savia Perú S.A.) initiated an arbitration against the Company, arguing that it is not entitled to the payment of the conductive grant established in the contract, considering that until 2013 it made payments for an amount equivalent to the value of the assets in the amount of US\$200,000 thousand. On June 12, 2019, the Company filed its response with the Arbitration Center of the Lima Chamber of Commerce.

On July 12, 2021, the Arbitration Center of the Lima Chamber of Commerce issued the final award establishing the lease amount at US\$5,000 thousand per year effective from 2013, as well as the return of excess rents charged to Savia since that date, according to the resolution of the Award, by which on September 28, 2021, the Company filed a claim for annulment of the arbitration award before the Judiciary, because, according to Management, there are defects in the arbitration process that are grounds for nullity. Likewise, the suspension of the enforcement of the aforementioned award was requested, and the lawsuit was admitted in 2022 by the Judicial Power. As of September 30, 2025, and December 31, 2024, the resolution of the annulment request is pending.

- (b) This item includes funds received as advances from domestic and foreign customers amounting to US\$27,109 thousand (equivalent to S/96,210 thousand), to guarantee the supply of fuel pending dispatch (US\$14,088 thousand equivalent to S/52,595 thousand as of December 31, 2024).
- (c) Taxes payable as of September 30, 2025 mainly include excise tax, road tax, FISE (Fondo Inclusión Social Energético), perceptions and Osinergmin tax for US\$39,262 thousand, US\$12,465 thousand, US\$1,439 thousand, US\$1,395 thousand and US\$756 thousand, respectively. Taxes payable as of December 31, 2024 include mainly the road tax, FISE (Fondo Inclusión Social Energético), perceptions and Osinergmin tax for US\$5,269 thousand, US\$2,047 thousand, US\$1,554 thousand and US\$1,050 thousand, respectively.
- (d) These correspond to security deposits received by third parties for transporting fuel, which cover possible accidents. If there are no claims, the security amount is returned at the end of the contract.
- (e) Corresponds to the consideration received from Matheson Global in accordance with the usufruct contract for the hydrogen (PHP) and nitrogen (NIS) plants of NRT for 20 years. Under this contract, in February 2023, the Company collected in advance the amount of US\$50,000 thousand and as of September 30, 2025 the balance amounts to US\$43,333 thousand and as of December 31, 2024 the balance amounts to US\$45,428 thousand. The use of the indicated plants will be exclusively to

provide operating services in accordance with the hydrogen and nitrogen supply contract signed between Matheson Global and the Company.

(a) Provision for environmental improvements and well plugging -

The Peruvian State promotes the conservation of the environment and the rational use of natural resources in hydrocarbon activities, in harmony with the Political Constitution of Peru; Law No. 26221, Organic Law that regulates hydrocarbon activities in the National Territory; Law No. 26821, Organic Law for the Sustainable Use of Natural Resources; Law No. 27446, Law of the National Environmental Impact Assessment System; Law No. 28245, Framework Law of the National Environmental Management System; Law No. 28611, General Environmental Law; and Law No. 29134, Law Regulating Environmental Liabilities of the Hydrocarbon Subsector, among others.

The MEM, through Supreme Decree No. 039-2014-EM published on November 12, 2014, approved the new Regulation for the Environmental Protection from Hydrocarbon Activities, which establishes the rules and provisions to regulate in the national territory the Environmental Management of the activities of exploration, exploitation, refining, processing, transportation, commercialization, storage and distribution of hydrocarbons, throughout their life cycle, in order to prevent, control, mitigate, rehabilitate and remedy the negative environmental impacts of such activities.

Likewise, within the framework of Legislative Decree No. 674, the Law on the Promotion of Private Investment in State-Owned Enterprises, the Company assumed contractual commitments for environmental remediation of its privatized units, guaranteed by the Peruvian State. Therefore, in accordance with legal regulations, signed contracts, and its business management policies, as of September 30, 2025, and December 31, 2024, the Company continues to carry out environmental remediation work at its own operating units and privatized operating units.

Privatized Operating Units -

Since 2017, no significant environmental remediation work has been carried out at the Privatized Operating Units, considering the new regulatory framework; however, legal, and administrative procedures are being carried out within the framework of the Privatized Operating Unit Contracts.

In compliance with these provisions, the Company has established provisions to address the negative environmental impacts generated during the operation of the privatized units. As of September 30, 2025, the balance of this provision for privatized units amounts to US\$7,508 thousand (US\$7,666 thousand as of December 31, 2024).

In the case of the privatized units (La Pampilla Refinery, Lubricants Plant, Lot X, Lot 8, Terminals and Sales Plants, and Electricity and Natural Gas Generation Plant), the provisions made were based on Environmental Studies, which received a favorable opinion from the General Directorate of Hydrocarbons - DGH or the General Directorate of Energy Environmental Affairs - DGAAE.

Own Operating Units -

Of a total of 230 projects of its Environmental Adaptation and Management Programs (PAMA) executed and fulfilled by the Company since 1995 to adapt its operations to the first Regulation for Environmental Protection in Hydrocarbon Activities (Supreme Decree No. 046-93-EM), as of September 30, 2025, and December 31, 2024, 210 projects have been executed.

Regarding the management instrument of the Complementary Environmental Plan (PAC) of the NRT (formerly PMRT), due to an operational need it has been determined that the "Installation of the Oxidizer for the spent caustic plant from the treatment of cracked naphtha and LPG (Item 9 of the PAMA)" must be carried out, with the Technical Report PMRT No. 113-2015-PP of December 21, 2015, which was approved by Board Agreement No. 113-2015-PP, indicating that the spent soda plant would be part of the scope of the activities to be developed by the PMRT.

The Company's own operating units correspond to Talara Operations, Pipeline Operations, Conchán Refinery, Selva Refinery, Airport Sales Plant and Lot 64.

In compliance with these provisions, the Company has made provisions for the remediation of the negative environmental impacts generated by its operations in its own operating units from 1997 to 2023. As of September 30, 2025, the balance of this provision for the Company's own operating units amounts to US\$43,259 thousand (US\$53,532 thousand as of December 31, 2024).

In the case of its own operating units, the provisions made are based on information from the Company's ISO 14001 Environmental Management Systems and on available cost data from the privatized units. They are also updated annually based on its own operating needs, the cost of work actually performed or in progress, market prices, and the estimated costs of remaining work to be performed, based on information originating from its own operating units.

As of September 30, 2025, the "Characterization of Contaminated Sites" reports of 21 Company facilities are under review by personnel from the Environmental Transportation and Distribution Headquarters, with the purpose of being presented to the MEM.

From 2014 to 2025, a total of 94 incidents have been reported (79 due to third-party actions, 12 due to geodynamic phenomena, 2 related to technical aspects, and 1 yet to be determined) in the North Peruvian Oil Pipeline (hereinafter, ONP), of which 58 have completed their attention, 30 have been approved by the Environmental Assessment and Oversight Agency (hereinafter, OEFA), and 6 are still undergoing remediation work. The latter are constantly supervised and monitored by personnel from the Environmental Headquarters, with the commitment to ensure the sustainable operation of PETROPERÚ and the reduction of potential negative impacts on the environment.

Additionally, since 2014, 20 Environmental and Social Assessments have been conducted for significant events at the ONP, within the framework of the industry best practices on the subject. These assessments, among other things, have provided real-world data on the extent of the environmental impact caused by contingent events. In this regard, it is important to highlight that this information is useful to the Company in its defense against potential allegations of negligence and/or risks to health and the environment, and based on its results, it has been established that the environmental impacts are temporary, limited, and reversible.

Likewise, as a result of the contingencies that occurred at the ONP, the OEFA, through Directorial Resolution No. 012-2016-OEFA/DS, ordered the Company to submit a draft update of the ONP's environmental management report to the MEM. In this regard, the Company submitted its proposed Terms of Reference (TOR) for the Update of the ONP's PAMA to the DGAAE-MEM, which were approved by Report No. 022-2018MEM-DGAAH/DEAH dated September 7, 2018. However, on February 25, 2019, the MEM's Directorate of Environmental Assessment of Hydrocarbons (DEAH) sent the Company letter No. 171-2019-MEM-DGAAH/DEAH, which contained the recommendations that should be included as content of the TOR. In this context, the respective coordination was carried out so that finally on August 23, 2019, through report No. 588-2019-MEM/DGAAH/DEAH, the MEM approved the final TOR for the ONP PAMA Update.

In 2024, 6 significant spills were recorded due to exogenous facts. Four of these are currently undergoing safety measures, and two have already completed cleanup activities.

From January to September 2025, 06 significant spills have been recorded, and containment and recovery work is currently underway in order to comply with current environmental regulations.

The movement in the provision for environmental improvements is detailed below:

	<u>Balances as of January 1</u> US\$000	<u>Payments</u> US\$000	<u>Provision and update</u> US\$000	<u>Balances as of December 31</u> US\$000

Sector Budget Law for Fiscal Year 2014, which authorizes the MEM to make financial transfers in favor of the Company for environmental remediation of the privatized businesses that belonged to it.

The mandate line of Article 6 of Law No. 28840, in the sense that the Peruvian State must compensate the Company for the environmental remediation of its privatized units, has been reaffirmed by the Twenty-Sixth Final Complementary Provision of Law No. 30114, Public Sector Budget Law for Fiscal Year 2014, which authorizes the MEM to make financial transfers in favor of the Company for the concept of environmental remediation of the privatized businesses that belonged to it. As of September 30, 2025, and December 31, 2024, an amount of US\$11,000 thousand was pending transfer for future disbursements, which was also recognized by the MEM in 2014.

Following procedures initiated in 2006, the Company has submitted invoices and similar documents to support the expenses incurred for environmental remediation to the Ministry of Energy and Mines (MEM) from January 2007 to October 2014. In response to this action, on December 31, 2014, the MEM deposited the amount of US\$1,377 thousand (equivalent to S/4,116 thousand) into the Company's accounts.

The Company has sent communications to the MEM requesting financial transfers for environmental remediation, which have resulted in contributions of US\$20,900 thousand (equivalent to S/62,600 thousand) being obtained during 2015, which were able to cover all of the expenses disbursed by the Company as of December 31, 2017, for environmental remediation in the privatized units. As of September 30, 2025, the Company is taking the necessary steps to transfer the outstanding S/34,000 thousand (equivalent to US\$9,382 thousand) to cover the environmental remediation work to which the Company is obligated.

(b) Provision for customs claims

Includes the provision for a tax contingency of S/. 56,000 thousand corresponding to a customs process related to discrepancies in the use of the mechanism for the replenishment of duty-free merchandise in 2019. To date, the case is currently before the Judiciary, which initially ruled in favor of the Tax Administration (SUNAT), prompting the Company to file an amparo appeal.

(c) Provision for civil claims -

As of September 30, 2025, the Company has estimated a provision of US\$ 11,267 thousand (equivalent to S/ 39,144 thousand), which is comprised of: a process to Heaven Petroleum Operators for US\$ 9,795 thousand (equivalent to S/ 34,049 thousand), Covise S.A., for US\$ 1,093 thousand (equivalent to S/ 3,800 thousand), AFP's for US\$ 20 thousand (equivalent to S/ 70 thousand), a lawsuit against Mr. Guerrero Yarlaque Julio for US\$ 2 thousand (equivalent to S/ 8 thousand), a Trust Estate lawsuit D.Leg. 861 for US\$ 20 thousand (equivalent to S/. 68 thousand), SEDAPAL for US\$ 96 thousand (equivalent to S/. 333 thousand), CCDA Asociados for US\$ 108 (equivalent to S/. 374 thousand), Vulcano for \$ 100 (equivalent to S/. 347 thousand) and Printer Graf for US\$ 27 (equivalent to S/. 95 thousand).

As of December 31, 2024, the Company has estimated a provision for US\$9,975 thousand (equivalent to S/37,356 thousand), which includes the following: a P&D process for US\$5,397 thousand (equivalent to S/20,347 thousand), Fracsa for US\$2,041 thousand (equivalent to S/7,644 thousand), Covise S.A., for US\$1,008 thousand (equivalent to S/3,775 thousand), a lawsuit against Mr. Murga Pastor Tobias for US\$731 thousand (equivalent to S/2,738 thousand), Man Trading for US\$215 thousand (equivalent to S/805 thousand) and others for US\$583 thousand (equivalent to S/2,183 thousand),

(d) Provision for labor claims -

This corresponds to contingent labor-related processes for which the Company considers that future disbursements will likely be made.

The movement in deferred income taxes for the years ended September 30, 2025, and December 31, 2024 are as follows:

	Balances as of January 1, 2024	Charge (credit) to income	Balances as of December 31, 2024	Charge (credit) to income	Balances as of September 30, 2025
	US\$000	US\$000	US\$000	US\$000	US\$000
Deferred assets:					
Provision for environmental remediation	21,047	(2,929)	18,118	(2,226)	15,892
Tax benefit of carryforward loss	254,416	195,660	450,076	-	450,076
Lease liabilities	10,759	6,477	17,236	(4,349)	12,887
Taxable Ebitda	78,728	82,582	161,310	-	161,310
Other provisions	8,544	1,241	9,785	(12,759)	(2,974)
Provision for impairment of assets	119,890	-	119,890	-	119,890
	<u>493,384</u>	<u>283,031</u>	<u>776,415</u>	<u>(19,333)</u>	<u>757,081</u>
Deferred liabilities:					
Right-of-use assets	(10,842)	(7,404)	(18,246)	4,033	(14,213)
Attributed cost of property, plant and equipment and intangibles and exchange rate effect of non-monetary items (*)	(434,529)	(94,125)	(528,654)	62,052	(466,602)
	<u>(445,371)</u>	<u>(101,529)</u>	<u>(546,900)</u>	<u>66,086</u>	<u>(480,814)</u>
Net deferred assets (liabilities)	<u>48,013</u>	<u>181,502</u>	<u>229,515</u>	<u>46,752</u>	<u>276,266</u>

(*) Corresponds to the deferred tax generated by exchange rate fluctuations affecting non-monetary items (mainly Property, plant, and equipment), due to the fact that the Company pays income tax in a different currency (soles) than its functional currency (US\$).

During 2025, the US dollar depreciated significantly against the sol, generating deferred income tax revenue of US\$62,052 thousand. Likewise, during 2024, the US dollar also depreciated significantly against the sol, generating deferred income tax revenue of US\$96,839 thousand.

19 EQUITY

a) Share capital -

As of September 30, 2025, the authorized, subscribed and paid-in capital is represented by 15,672,480,855 common shares, with a par value of one sol each, and as of December 31, 2024, by 9,572,168,000. As of September 30, 2025, the composition of the shareholding that participates in the issued capital of the Company comprises:

Class	Number of shares	Percentage %
A	12,537,984,684	80
B	3,134,496,171	20
	<u>15,672,480,855</u>	<u>100</u>

The class "A" shares are held by the Ministry of Energy and Mines and the Ministry of Economy and Finance, which own 32% and 48%, respectively. These shares have voting rights, but are indivisible,

non-transferable, and unseizable, and may not be subject to security interest, usufruct, or any other encumbrance.

The class "B" shares are held by the Ministry of Energy and Mines and the Ministry of Economy and Finance, which own 8% and 12%, respectively. These shares have voting rights and may be transferred through centralized trading mechanisms on the stock market.

Emergency Decree No.013-2024 (Note 1-a) approved, among other things, the following share capital increases:

- The capitalization of the temporary financial support approved by Article 2 of Emergency Decree No. 010-2022, granted by the Ministry of Economy and Finance (MEF) through the General Directorate of the Public Treasury, up to the amount of US\$750,000 thousand plus accrued interest as of the effective date of this legal provision, extinguishing the payment obligation. The capitalized amount of US\$828,110 thousand (equivalent to S/3,122,804 thousand) was reconciled with the Ministry of Economy and Finance MEF.
- The assumption by the Ministry of Economy and Finance, through the General Directorate of the Public Treasury, of the obligations of PETROPERÚ S.A., corresponding to the working capital loan contracted with Banco de la Nación, up to the amount of US\$800,000 thousand plus accrued interest as of the effective date of this Emergency Decree, which is guaranteed by the National Government, approved by Article 2 of Emergency Decree No. 004-2024, constituting the State's capital contribution to the Company for US\$789,581 thousand (equivalent to S/2,977,509 thousand). The amount of the capital increase was reconciled with the MEF.

On April 1, 2025, the Public Registries of Lima issued the corresponding registration certificate for this capital increase.

b) Additional capital -

On April 1, 2025, the Public Registries of Lima issued the registration certificate corresponding to the share capital increase for S/ 6,100,312,855.

c) Legal reserve -

According to Article 229 of the General Companies Law, a legal reserve must be established by transferring at least 10% of the annual net profit until it reaches 20% of paid-in capital. In the absence of retained earnings or unrestricted reserves, the legal reserve may be applied to offset losses and must be replenished from the earnings of subsequent years.

As of September 30, 2025, and December 31, 2024, the legal reserve recorded amounts to US\$8,724 thousand (equivalent to S/30,324 thousand).

d) Retained earnings -

The General Shareholders' Meeting approved the dividend policy which states the following: "The distributable profits and after deducting the workers' participation, the legal taxes and the legal reserve that may correspond, will be allocated to investment projects for the modernization or expansion of the company's activities, in compliance with its approved annual and five-year objectives, in accordance with the provisions of Article 4 of Law No. 28840 - Law for the Strengthening and Modernization of Empresa de Petróleos del Perú - PETROPERÚ S.A.", which is consistent with Article Twenty-Ninth, literal F) of the current Social Statute.

20 INCOME FROM ORDINARY ACTIVITIES

28 INCOME TAX

Income tax expense is recognized based on management's estimate of the expected annual income tax rate for the full financial year. The estimated effective annual rate used for the years 2025 and 2024 is 9.7% and 19.0%, respectively.

a) Tax rates -

In accordance with current legislation, the Company is individually subject to applicable taxes. The Company believes it has determined the tax bases under the general income tax regime in accordance with current tax legislation, which requires adding and deducting from the income shown in the financial statements those items that the aforementioned legislation recognizes as taxable and non-taxable, respectively. The income tax rate has been set at 29.5% from 2017 onwards, by Legislative Decree No. 1261 published on December 10, 2016. The determination of income tax for the activities of the Lot Operations segment is carried out separately from the activities of the other segments.

As of September 30, 2025, the Company has tax losses of S/5,720,053 thousand, equivalent to US\$1,525,682 thousand. The system used by the Company to carry forward tax losses is the "B" system,

which consists of offsetting said losses, up to their exhaustion, against 50% of the net income obtained in the fiscal years immediately following their generation. The “B” system option was exercised at the time of filing the annual Income Tax return for the fiscal year in which the losses were generated. Once the option has been exercised, it is not possible to modify the system. Based on management's projections, the Company will offset accumulated tax losses against future taxable income. 2024 did not offset carryforward losses.

It should be added that under Peruvian tax law, non-domiciled individuals are taxed only on their Peruvian source income. Thus, in general terms, income obtained by non-domiciled individuals for services rendered in our country will be subject to income tax at a rate of 30% on a gross basis, as long as a Double Taxation Avoidance Agreement (DTA) is not applicable. For purposes of technical assistance services or digital services rendered by non-domiciled entities in favor of domiciled entities, the place of rendering of such services will be indistinct and, in all cases, will be subject to income tax at a rate of 15% and 30% on a gross basis, respectively. The rate applicable to technical assistance services will be 15%, provided that the requirements set forth in the Income Tax Law are met.

b) Income tax determination -

The income tax result shown in the statement of comprehensive income as of September 2025 and September 2024 (which corresponds entirely to the income tax applicable in the country) comprises:

	<u>2025</u> <u>US\$000</u>	<u>2024</u> <u>US\$000</u>
Current	(8,763)	(9,981)
Deferred (Note 18)	46,752	(35,244)
	<u>37,989</u>	<u>(45,225)</u>

29 CONTINGENCIES

As of September 30, 2025, and December 31, 2024, the Company has the following pending contingent labor, civil, tax and customs claims considered possible:

	<u>2025</u> <u>US\$000</u>	<u>2024</u> <u>US\$000</u>

Labor proceedings	2,531	1,730
	<u>94,622</u>	<u>115,975</u>

The movement of contingencies is detailed below:

	Balance as of January 1	Additions	Rebates	Balance as of September 30
	US\$000	US\$000	US\$000	US\$000
Civil proceedings (a)	99,177	25,314	(32,504)	91,987
Tax and customs proceedings (b)	15,068	-	(14,964)	104
Labor proceedings	1,730	1,012	(211)	2,531
	<u>115,975</u>	<u>26,326</u>	<u>(47,679)</u>	<u>94,622</u>

- a) As of September 30, 2025, the main civil lawsuits include Biddle Inc. S.A.C. for US\$ 7,946 thousand (equivalent to S/ 27,620 thousand), Comunidad Nativa San José de Paragua Poza for US\$ 8,909 thousand (equivalent to S/ 30,967 thousand), SIMA for US\$ 5,403 thousand (equivalent to S/ 21,933 thousand), APTIM for US\$ 2,871 thousand (equivalent to S/ 9,979 thousand), CIME Ingenieros SRL for US\$ 1,817 thousand (equivalent to S/ 6,317 thousand), SUNAT Public Prosecutor for US\$ 1,073 thousand (equivalent to S/ 3,800 thousand), Pluspetrol Norte for US\$ 863 thousand (equivalent to S/ 3,000 thousand), AFP's for US\$ 1,669 thousand (equivalent to S/ 5,803 thousand), Rebaza Vigo Percy for US\$ 1,247 thousand (equivalent to S/ 4,335 thousand), Hispánica for US\$ 857 thousand (equivalent to S/ 2,981 thousand), Ruesta de García Juana or Ubillus Ordinola for US\$ 575 thousand (equivalent to S/ 2,000 thousand), GUVI Services for US\$ 443 thousand (equivalent to S/ 1,540 thousand), Pan American Games for US\$ 442 (equivalent to S/ 1,537 thousand), Consorcio FCC for US\$ 4,916 thousand (equivalent to S/ 18,056 thousand), Consorcio P&D US\$ 5,240 thousand (equivalent to S/ 18,614 thousand), Murga Pastor Tobías for US\$ 3,169 thousand (equivalent to S/ 11,017 thousand) and PNP Dirección de E y F for US\$ 709 thousand (equivalent to S/ 2,464 thousand) among the main ones. Processes maintained with Heaven Petroleum Operators for US\$ 31 thousand (equivalent to S/ 115,423) CEBA S.A. for US\$ 312 thousand (equivalent to S/ 1,179 thousand), E&A Afines for US\$ 460 thousand (equivalent to S/ 1,865 thousand) and AFP Profuturo for US\$ 270 thousand (equivalent to S/ 957 thousand) were annulled.
- b) As of September 30, 2025, the process maintained with the Tax Administration (SUNAT) for US\$ 14,964 thousand (equivalent to S/ 54,032 thousand), related to file 06304-2019-01801 was annulled as it was filed by Legal in June 2025.

30 BASIC AND DILUTED EARNINGS (LOSS) PER SHARE

The calculation of basic and diluted earnings per share as of September 30, 2025, and 2024, which are expressed at the same value as there are no dilutive shares, is presented below:

	<u>Profit US\$000</u>	<u>Weighted average of Shares in circulation (in thousands)</u>	<u>Profit per share</u>
As of September 30, 2025			
Profit/(loss) per basic and diluted share	(355,003)	12,613,968	(0.028)
As of September 30, 2024			
Profit/(loss) per basic and diluted share	(745,383)	9,572,168	(0.078)

31 GUARANTEES

Guarantees and letters of guarantee -

As of September 30, 2025, the Company maintains letters of guarantee issued by local financial institutions in favor of suppliers for S/95,210 thousand (equivalent to US\$26,827 thousand) and for US\$79,008 thousand. As of September 30, 2024, it maintained letters of guarantee issued in favor of suppliers for S/107,561 thousand (equivalent to US\$28,961 thousand) and for US\$86,389 thousand.

32 RELATED PARTIES

The Peruvian Government owns the share capital of the Company and is represented by each member of the General Shareholders' Meeting. According to the twenty-third article of PETROPERU S.A.'s by-laws, the General Shareholders' Meeting is composed of five members representing the class "A" and "B" shares owned by the Peruvian State: The Ministry of Energy and Mines, who will preside, and four members representing the Peruvian State, appointed by Supreme Decree. Transactions between the Company and the Peruvian government and the Ministry of Energy and Mines are related to transactions with shareholders.

33 SUBSEQUENT EVENTS

On October 16, 2025, at the General Shareholders' Meeting in Universal Session, it was agreed:

- To remove Mr. Alejandro Narváez Liceras as member of the Board of Directors and Chairman of the Board of Directors of Petróleos del Perú - PETROPERÚ S.A., as of October 16, 2025.
- To appoint Mr. Fidel Augusto Moreno Rodríguez as Chairman of the Board of Directors of Petróleos del Perú - PETROPERÚ S.A., as of October 16, 2025.

On October 24, 2025, the following resolutions were adopted at the Board of Directors' Meeting:

- By Board Agreement No. 126-2025-PP dated October 24, 2025, it was agreed to terminate, effective October 25, 2025, the appointment of Mr. Oscar Electo Vera Gargurevich as Acting General Manager, approved by Board Agreement No. 103-2024-PP dated November 11, 2024; ordering that he returns to his position established in the Company's Complementary Organizational Structure.
- By Board Agreement No. 126-2025-PP dated October 24, 2025, it was agreed to appoint Mr. José Manuel Rodríguez Haya to the position of General Manager (e) of Petróleos del Perú – PETROPERÚ S.A., effective October 25, 2025.
